

T3 AFFINITY

RETAIL SOLUTIONS

T3 AFFINITY CLOTHING RACK

T3 Affinity is a modular framework designed for all manner of retail display requirements; created by T3 Systems as a cost effective solution with a focus on simple installation, efficient storage and transport.

The system is made of aluminium horizontal beams and vertical posts joined together using a no tools patented twist lock connection.

There is an extensive range of retro fit parts designed to support all graphic types, shelving solutions, lighting, monitor and tablet holders.

With the patented 'Twist - Lock' assembly method it is simple and efficient to assemble all manner of display features and structures.

Mobile clothing display rack

The T3 Affinity system is the ideal retail solution for all merchandise display applications. The Affinity posts and beams can be cut to varying lengths allowing you to create custom heights and lengths of display racks.

The addition of wheels (locked and unlocked) to the design allows it to become a mobile display feature but they can be replaced by tradition feet.

Why not illuminate your display rack for an extra eye catching feature? By using PETG panels and then adding internal Wandlite LED tubes it becomes a vibrant centre piece.

With a build time of under 10 minutes for a single person it is definitely a must for all retail applications.

- Double Shelf Bracket allows you to attach the clothes rail to your T3 Affinity framework.

- End fitting. This fits into the Double Shelf bracket and allows for the rail to be easily inserted.

- Clothes Rail tube for the use of clothing display hangers
