

Press release: 4-6-2019

NNO Coatings nominated for the Dave Bebelaar Award 2019

We are proud to be nominated as agent of C-Bond NanoShield™ for the Dave Bebelaar Award in the Netherlands. This Award initiated by the Sustainable Repair Foundation (Stichting Duurzaam Repareren) is looking for the best sustainability initiative in the automotive sector.

C-Bond Systems www.cbondsystems.com is the manufacturer of the glass strengthener C-Bond NanoShield™ a water-based nano-emulsion with 22 patents and licenses.

This glass strengthener is applied to windshields of cars, buses and trucks, repairing the imperfections inherent in automotive glass. The product improves glass strength by permeating the glass surface and detecting and filling the microscopic flaws and defects randomly distributed all over the glass surface. The result is that the windshield becomes stronger and better resistant to the effects of road debris.

In the Netherlands, around 400,000 windshields are replaced every year. With the application of C-Bond NanoShield™, this will bring the number down with tens of thousands of windshields every year.

This will also decrease the costs of windshield damage for lease-companies, fleetowners and car rental companies. Insurance companies and their customers will also benefit from less windshield damage.

To become the WINNER of the Dave Bebelaar Award we need your help. Please go to <https://www.stichtingduurzaam.nl/event/dave-bebelaar-award-2019/> and vote for us!

Thank you, we appreciate your support!

Sincerely

Toon Sanders
