Re-registration of feed additives

On November 8, 2010, the deadline for submitting applications for the re-registration of feed additives in the European Union according to regulation (EU) 1831/2003 expired. For those feed additives for which an application has not been submitted will be withdrawn from the market from November 9, 2010.

Nor-Feed A/S has submitted applications for lemon extract, Nor-Spice® AB and olive leaf extract, which is an ingredient in Nor-Guard® OV11 and Nor-Guard® OMV. In addition, our partner Nor-Feed Sud Sarl has applied for the re-registration of grape extract, Nor-Grape®, and lemon balm extract, Nor-Balm®. Many other companies, including some of our suppliers, have submitted applications for other flavouring compounds, which are commonly used by Nor-Feed A/S. This means that our products can remain on the market until further notice from the European Food Safety Authorities.
