Co-Operation between R2 Agro A/S and Nor-Feed A/S

A co-operation between the two companies R2 Agro A/S and Nor-Feed A/S has been established, covering several areas.

The co-operation includes that R2 Agro A/S takes over all rights to Nor-Feed A/S' product-line Cabanin. R2 Agro A/S will invest considerably in the development of further variants of these efficient products that will be marketed internationally.

R2 Agro will continue the development of a range of very efficient, including cost-efficient, feed-additives in which the positive effects of specific synthetic and specific naturally occurring elements are combined, resulting in very interesting, positive effects being measurable on animals' productivity-parameters.

Details about R2 Agro A/S' present and future range of feed components, additives, pre-mixes and functional complementary feed are available from Katja Juul Nielsen, at kjn@r2agro.com

Info about R2 Agro A/S in general is available on www.r2agro.com
