Literature about the different elements in Nor-Guard AV Powder.

Nor-Guard AV Powder contains a unique combination of botanical elements from plants, which all, according to international literature, possess strong antioxidant and other properties. **Nor-Guard AV Powder** is developed to be beneficial to the animals during stress-full periods, by strengthening the animals' defense system, due to its antioxidative, antibacterial and antiviral properties, its anti-inflammatory and analgesic effects and its diarrhea reducing effect.

Nor-Feed has a range of articles available from international journals about the different elements included in **Nor-Guard AV Powder**. If you interested in the literature, you are more than welcome to contact Jeanne Williams (j.williams@norfeed.dk) for further information.

Nor-Feed A/S and its sister companies develop and manufacture a long line of natural antioxidants for the animal feed industry and for preservation purposes. For more information on these products, please contact Nor-Feed A/S (office@norfeed.dk).
