

## PRODUCT NOTE NOR-GUARD OV11

### Nor-Guard™ OV11

– A strong antioxidant with positive effects on animals' health and performance –

*The inclusion of natural antioxidants in animal feeds has beneficial effects on the performance and health of production animals. Antioxidants, in a natural way, reduce oxidative stress and improve animal performance and thereby reduce the need for medication, such as antibiotics.*

**Nor-Guard™ OV11** contains a unique combination of botanical elements rich in different types of antioxidants. This gives a unique and very cost-effective product, which has proven to stimulate the health and performance of different types of production animals.

#### Nor-Guard™ OV11

**Nor-Guard OV11** is one of the **Nor-Add's** products with a high content of natural antioxidants. Results from different trials with **Nor-Guard OV11** have shown that it has considerable positive effects in relation to animal production by:

- Increasing the ADG,
- Improving the efficiency of the feed conversion,
- Reducing the need for medication, □  
Improving the meat quality.

#### Specifications

**Nor-Guard™ OV11** is a blend of two standardized botanical extracts: **olive leaves** (*Olea europaea*) and **grapes** (*Vitis vinifera*), which gives a unique combination of water and fat soluble antioxidants. These plant extracts are rich in polyphenols, which are capable of reducing the oxidative stress, preserving vitamin E and C, as well as nutrients in the organism.

**Nor-Guard OV11** is a natural feed premix rich in natural antioxidants available as a concentrate powder for inclusion in feeds. **Nor-Guard OV11's** main target groups are piglets, growers, finisher pigs, sows, calves, lactating cows, broilers and layers.

Feeding **Nor-Guard OV11** is very cost-effective, as it improves the performance and health of the animals at a very low inclusion rate.
