# Lunch and Learn

**At Nordic EMC we are always looking for a good dialog with our peers and customers.**

To facilitate this, we regularly conduct “Lunch and Learn” sessions, where we highlight a few topics to share our latest knowledge and experience with anyone who is interested.

A “Lunch and Learn” session is a small 15-30 minute session on Microsoft Teams, where we explain a certain topic to you during your lunch break. This way, it’s convenient to schedule for most people, and it will not take time out of your otherwise busy schedule. You are of course encouraged to both eat you lunch and ask questions during the session 🤪

If you would like to participate in one of our sessions, please fill out the note below with your contact details and the topic of interest, and place it in the box next to this poster.

For inspiration on a topic, please consult our flyers, where we explain a bit about some of the interesting things we can assist you with.
