

Expert OT Security Services

Securing Today—Designing Tomorrow

At Nordic EMC, we specialize in providing comprehensive Operational Technology (OT) security solutions across some of the most critical sectors. Adhering to rigorous standards like the IEC-62443, we ensure that your infrastructure is protected today and in the future.

Why Choose Nordic EMC?

- **Sector-Specific Expertise:** Our in-depth experience with strategic infrastructure sectors ensures tailored solutions that address the unique challenges of nuclear, high voltage, and offshore wind environments.
- **Comprehensive Compliance:** Each solution strictly follows IEC-62443 standards, offering a guarantee of both security and compliance.
- **Distinct Design and Implementation Services:** We separate our design and implementation processes to focus on specialized excellence in each phase.

Our Services Include:

- **Specification Writing:** Detailed and precise analysis and specifications that serve as the blueprint for secure and efficient systems, tailored to meet the unique demands of your operational environment.
- **System Design:** Custom system designs that are not only secure, but also optimize operational functionality and efficiency.
- **System Implementation:** Meticulous implementation services that translate design into fully operational security systems, executed with precision and expertise.

In today's digital age, the security of operational technologies is not just about protection; it's about ensuring the resilience and longevity of your critical infrastructure. Partner with Nordic EMC and experience security by design that complies with international standards.
