

Wind farm Metering solutions

At Nordic EMC we specialize in high-end metering solutions tailored for offshore wind farms. Our products boast a standardized, optimized design that delivers several key benefits:

Rapid Deployment: Our standardized design significantly speeds up delivery times.

Cost Efficiency: Achieve cost savings with our economically designed solutions.

Space-Saving: Ultra-compact design featuring a complete set-up with up to 12 meters in a single cabinet.

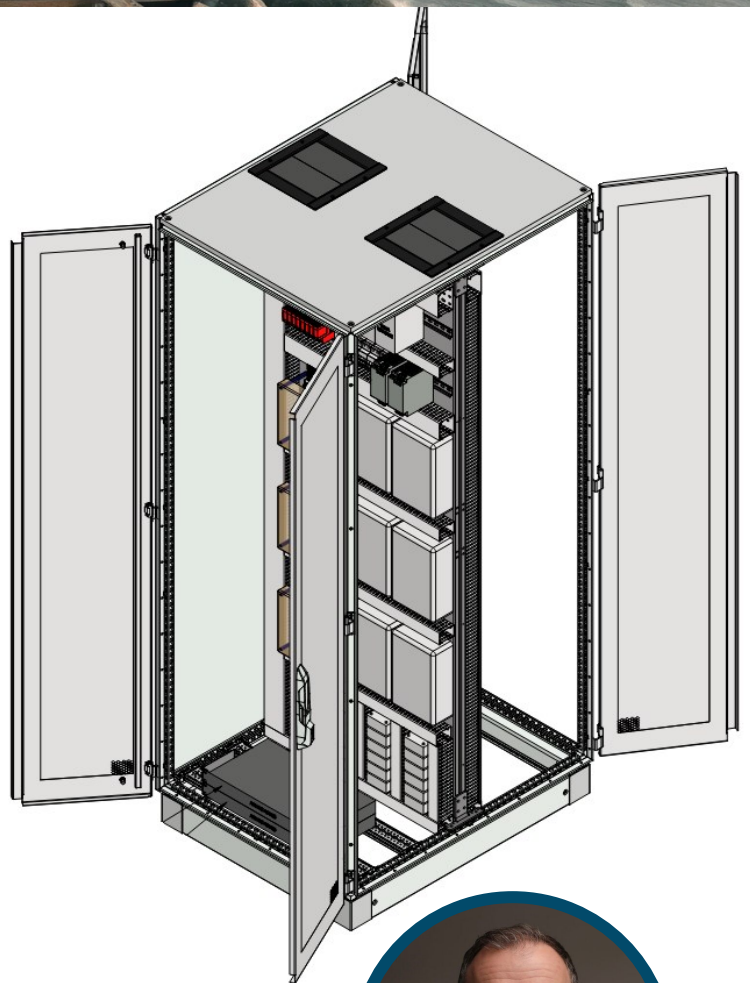

Certified Reliability: Fully certified solutions that you can trust.

Proven Performance: Successfully implemented in multiple offshore wind farms worldwide.

Enhanced Cyber Security: Built-in security features ensure safe integration into metering back-ends.

Flexible Data Handling: Optional integration with local SCADA systems for parallel data management.

Discover how Nordic EMC can empower your wind farm operations with reliable and efficient metering solutions.
