

Vegetables at Olden Community Garden - update Spring 2023

The past few weeks have been spent spreading well rotted manure on the veg beds - some people enjoyed this job more than others! Crops that have overwintered well include garlic, leeks, parsley, red veined chicory and mustard greens.

Garlic bed

Greenhouse greens

Spinach, parsley and greens are also doing well in the greenhouse.

Baby kale, wasabi, spinach and red lettuce have been sown, ready for early summer.

Spring leeks

spring greens

'Little Explorers' - our mini garden club for children is going from strength to strength; last week we checked out a local community garden and ordered pizza.
