Introduction

'Together', that is the meaning of Pamoja in Swahili, the language they speak in Kenya. And 'together' is how we want to work with our foundation. We strongly believe that every development must be realized in collaboration with the local population. Cooperation leads to sustainable solutions that are supported by the people for whom we realize the solution.

Our mission is to start, guide and implement projects in Kenya in collaboration with the local population. We mainly focus on water projects and sanitation projects that simultaneously create employment for the local population.

Pamoja Kenya depends on financial support from others. We raise funds via (telephone) acquisition, BIS (International Cooperation Office) and Wild Geese (Wilde Ganzen). In addition, we have set up a web shop with products that are handmade in Kenya. A percentage of the sales goes to our ongoing projects and expenses of the foundation. At the Pamoja Kenya Foundation, you are always assured that your donation will actually be spent on projects that benefit the local population.

On the 2nd of November 2011, the Pamoja Kenya Foundation was established by notarial deed. The objective of the foundation is:

- a. the start-up, supervision and execution of projects in Kenya, which include the installation of water wells, installation of water pumps, realization of public toilets / public showers and projects like that. With the development of such initiatives, the foundation wants to support the local population.
- b. promoting employment by launching and guiding such projects to improve the future of the underprivileged population.
- c. combat diseases such as cholera and typhoid.

The foundation has its registered office in The Hague.

The foundation has an ANBI status, so donations from people or organizations in the Netherlands to this foundation are deductible for the Income Tax.

Review

In the year 2024, we received a total of € 29.277,- in donations. You can read more about the expenses and income in the financial section starting on page 9.

Funds in the year 2024.

The results of the various donors together with Wilde Ganzen have again ensured that we have partially achieved our goals in 2024. Given the situation in terms of fundraising and the current political situation for development cooperation in the Netherlands and the additional burden that funds have to pay, fundraising has taken on a different dimension and has become a greater challenge. We expect to receive enough donations in 2025 to ensure the progress of our projects for 2024/2025.

We are also extremely proud that our loyal donor the Hendrik van Dijk fund will continue to support us in 2025. Their nameplate has now been placed with the projects.

In the year 2024, the Ministry of Health continued to provide information on hygiene (as a result of Corona); it remains desperately needed. Partly due to the implementation of our projects in WATER and sanitation, we can proudly say that diseases such as cholera and typhoid have been reduced in the areas in which we work.

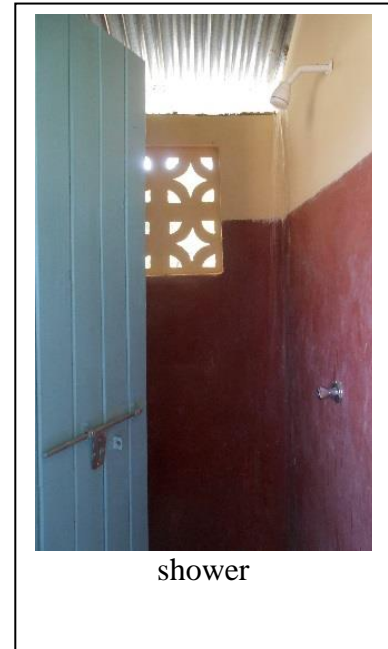

Our 'Rainwater Harvest Project' is still up to date and active, but the costs have only increased due to the deteriorating economic situation in Kenya.

You can donate for a water tank of, for example, 2000 litres, which costs €1,000, including drainage, concrete elevation and all technical parts, such as taps, etc. This provides 100 people (20 litres per person) with WATER. This project is a success, many entrepreneurs and/or individuals would like to contribute to a good

cause but do not know what or where. This donation also generates exposure for the company. A water tank can also be purchased with a donation of €200, -, donors choose to do this in a group as well. This is a tank of 1000 litres for 50 households, the water tanks make a big difference for the locals. Think about it, what can you do with WATER! In addition to hygiene, agriculture and arable farming etc.

The names of the donors automatically appear on the website of the Pamoja Kenya Foundation and companies automatically become partners of the foundation and their logo and 'company bio' appears on our partner page on the website.

At Pamoja Kenya Foundation, you are sure that the money will end up in the right place. We take care of this on a daily basis. We ourselves travel to our projects twice a year to open them and ensure that everything has been carried out satisfactorily. In this way, we also check whether our objectives have been pursued. In this way, we give the residents the feeling that they are taken seriously and are involved in the projects. In addition, the governor's assistant (also a member of parliament) officially our projects and explains to the residents how difficult it is to raise funds. So far, people are very grateful to us for providing them with water. A basic necessity of life. No WATER, no LIFE!

We are very active on social media, and this has borne fruit for our brand awareness. We have been able to further profile ourselves at various African embassies in The Hague thanks to our network capacities and the large network that we have built up over the years, both in the Netherlands and in Kenya. As a result, we are regularly invited to various occasions.

Realized projects in 2024

Waterwell Roka Vocational Centre

Chumani medical post

Roka Vocational Centre

Katana Ngalla Sec. school

Roka Vocational Centre

Watertower Chumani

Project goals

We were also able to achieve a part of our project goals in 2024. That's making two new wells and installing two water pumps.

In terms of implementation, we have divided the projects for the training centre of the Roka vocational centre (200 students) and the Chumani medical post (2000 patients), the Katana Ngalla secondary school (1335 and 36 teachers) and the inhabitants in this area into water and sanitation facilities. In 2024, we built a water tower, placed a water tank and installed two solar panels in both schools. The solar panels have again been installed by Perfect Concepts. The Pamoja Kenya Foundation is extremely proud that we were able to realize WATER at the 'Chumani' medical post. Our chairman, Marion van de Voort, paid a working visit to this project in 2024, during the execution of the work. She was in shock, to see that a medical post has no running water to carry out the work. You see this on television, but to see this in reality is heartbreaking. We are therefore pleased with the ingenuity of Mr. Philip Kahindi and his team in Kenya that they have devised to extend a water pipe underground from the training center to the medical station (about 25 meters). Underground should be emphasized here because this is not the custom in Kenya, at least not in this area. Because Mr. Philip Kahindi regularly visits the Netherlands, he has been able to implement this method in this project. This is the most normal situation for us in the Netherlands, but here in Matsangoni, absolutely not. And this is exactly what the Pamoja Kenya Foundation does, educating people and making them aware of developments that they do not know about. How do you make people independent if you don't explain this. The residents in these areas have no money to follow vocational training and have to educate themselves with what they can get their hands on. Their only goal is: "Bread on the Shelf".

The local population can now also make use of the facilities. They pay a small fee for it. This money is needed for the maintenance of the facilities, both for hygiene and for technical maintenance. The system for the financial contribution of the pupils for the maintenance of the facilities is implemented by increasing the tuition fees by KES 10 (approximately €0.07) per quarter per child.

Finally, the project must be maintained both technically and hygienically, and this cannot be done without funding. The Pamoja Kenya Foundation is the 'producer' and thus takes care of the finances, but the people themselves are responsible for the maintenance. And if we see during our visits that our rules are not followed as stated in the articles of association of our foundation, we will close the project. Philip Kahindi is a very important link, just like Morris Aziz. Both are members of the board of directors of the CBO of Kenya.

We were also fortunate to have electricity available for this project. We were able to extend it so that no generator had to be installed. The costs for drawing the current for the pump, wires and pipes are included in the budget. In addition, an electricity house has been built, which serves as a water tower for the water tank. Because we have been able to achieve this, the government pays part of the monthly electricity costs. This is unique. Our Wash Shower & Go project has now become a household name. The heads of the two schools, the teachers and the students are very happy.

The cooperation with the local government is also fantastic. But as we always say: without the team in Kenya and especially Philip Kahindi, this would never have been possible. Philip feels very responsible for the implementation of the projects.

Looking ahead 2025

In 2024, we will again realize a food security project (second), finalizing the sanitation part for Roka vocational centre, the Chumani medical post and the Katana Ngalla secondary school. In addition, we will start raising funds for our community centre. The centre will consist of various buildings including a training centre and it will take about three years before we can deliver the entire project. We start per building/component.

Our chairman Marion van de Voort will pay a working visit to the new projects in progress this year and the board in the Netherlands will also visit the projects in October 2025. A report will be made upon return.

Philip Kahindi is always very busy with the supervision of all work. He then sets off together with the carpenter, plumber and contractor to buy materials in order to limit costs as much as possible. How lucky we are to have him!

In cooperation with BIS (International Cooperation Office) and Wilde Ganzen and various other donors, it will be a successful year where we can change the lives of children and adults.

Through our Social Media channels such as Facebook, Instagram, TikTok, our newsletter and the reports after which will be made after every project which is executed.

Thank you for your attention and interest in the Pamoja Kenia Foundation.

The Hague, May 8th, 2025

The board of the Pamoja Kenia Foundation
Marion van de Voort (chair, secretary)
Theo Vogels (treasurer)
Marjo van der Knaap (general boardmember)
Kevin Bob Kargbo (media, social media)

In the meantime, we have put the Matsangoni area on the map. Below is a sketch of the projects carried out with the distances.

Once it was said to us, by the Kenyan government in Matsangoni, Kilifi County in Kenya, that we would realize villages (cities). In our wildest dreams, we never thought this would become a reality.

In the meantime, we have carried out 23 projects and provided 33,000 families with WATER and sanitation facilities.

We are extremely proud, and we do our part every time.

INCOME STATEMENT OF FOUNDATION PAMOJA KENIA FOR 2024
(amounts x € 1)

INCOME	2024		2023	
Received gifts of funds and foundations	22.427		5.340	
Private gifts and other	1.500			
Gross profit (merchandise)	396			
VAT and customs refund	15		83	
Total income		24.338		5.423
EXPENSES				
Miscellaneous costs	286		108	
Administration costs	3.497		1.144	
Bank charges	253		238	
Vat costs	34			
Fundraising costs	94		591	
Cost merchandise	950		83	
Spent on objective	12.450		18.000	
Total expenses		17.564		20.164
Deficit				14.741
Surplus		6.774		

The subsidy of Wild Geese (received in Kenia) was : € 5.350 so the total of received gifts is : € 29.277.

SPECIFICATION OF "SPENT ON OBJECTIVE"

PROJECTS	Water wells	Amount spent on objectives
projects		
1 – ROKA vocational centre and CHUMANI medical post	Incl. watertower – solar pumps and electricity	€ 6.450
2 – KATANA NGALLA secondary school and community	Incl. watertower – solar pumps and electricity	€ 6.000
Subsidy from Wilde Ganzen		€ 5.350
TOTAL		€ 17.800
