# MLM NET

## What you need to know

**6 FT**
OPTIMAL
(From MLM
to point of contact)

**8 FT**
MINIMUM
(From point
of contact to net)

- Select MLM Net when hitting into a net indoors or outdoors.

- For optimal results, a well-lit environment and the use of white (not plastic or foam) golf balls is required.

- Accuracy is decreased in poorly lit environments. IMPORTANT: for optimal performance you must select the proper club before hitting; shot performance is affected by club selection.

- Proper alignment (MLM 6 feet behind the ball and aimed down your target line) and club selection (selecting your club in the MLM app before hitting the ball) are critical for accurate metrics.
