1031 Risk Disclosure:

- There is no guarantee that any strategy will be successful or achieve investment objectives
- Potential for property value loss – All real estate investments have the potential to lose value during the life of the investments
- Change of tax status – The income stream and depreciation schedule for any investment property may affect the property owner’s income bracket and/or tax status. An unfavorable tax ruling may cancel deferral of capital gains and result in immediate tax liabilities
- Potential for foreclosure – All financed real estate investments have potential for foreclosure
- Illiquidity – Because 1031 exchanges are commonly offered through private placement offerings and are illiquid securities. There is no secondary market for these investments
- Reduction or Elimination of Monthly Cash Flow Distributions – Like any investment in real estate, if a property unexpectedly loses tenants or sustains substantial damage, there is potential for suspension of cash flow distributions
- Impact of fees/expenses – Costs associated with the transaction may impact investors’ returns and may outweigh the tax benefits
