

# Agreement between S:t Eriks, the leading manufacturer of concrete- and road protection-systems in Sweden, and Photocat combats air pollution

Combatting one of the most harmful environmental challenges today – air pollution – is one of the key aspects of S:t Eriks AB and Photocat A/S' newly entered agreement. The agreement entails the release of a series of concrete products applied with Photocat's documented efficient NO<sub>x</sub>-reducing photocatalytic technology. The partnership will initially focus on road protection facilities, which mitigate NO<sub>x</sub>-pollution.

S:t Eriks' Jörgen Bergengrip (Director Paving Division) says: "We have chosen Photocat as our partner within photocatalytic products due to their strong and documented NO<sub>x</sub>OFF technology, which is stronger than anything we have seen in the market. Further, we want a partner that are able to communicate professionally with substantiated market claims. S:t Eriks has

always been focused on delivering real value to its customers. Personally, I expect a strong and growing portfolio of S:t Eriks products with NO<sub>x</sub> reducing capabilities in the coming 2 - 4 years."

Photocat's Michael Humle (CEO) adds: "We consider S:t Eriks to be a very strong partner to launch NO<sub>x</sub> reducing products in the important Scandinavian market." Photocat now holds strong partnerships in NO<sub>x</sub>OFF concrete solutions in Scandinavia through its partnerships with ASAK Miljøstein in Norway, Gammelrand in Denmark and now S:t Eriks in Sweden.

## About Photocat:

Photocat manufactures patented photocatalytic coating materials for outdoor and indoor applications, which degrade NO<sub>x</sub> and VOCs when exposed to light. Both NO<sub>x</sub> and VOCs are severely damaging to human health. Photocat's patented technology is very efficient and an economically viable alternative to many of the traditional technologies targeting NO<sub>x</sub> (e.g. bus catalysts, flue gas cleaning etc.). Photocat's shares are listed on Nasdaq First North Stockholm with the ticker symbol PCAT. The company's certified advisor is Mangold Fondkommission.

## About S:t Eriks:

S:t Eriks is Sweden's largest producer of concrete products and has a proven track record in launching innovative products. Furthermore, S:t Eriks is the leading company in Sweden within paving, infra, roofing and water & sewage systems. The company employs more than 400 dedicated people with a strong skill in design and special casting which assists its customers from idea to finished solutions. S:t Eriks main customer segments are large to small contractors in the construction industry, municipalities, government agencies and retail chains.
