One Year of PlastTrack

Sampling micro- and nanoplastics at Boknis Eck station (Eckernförde Bay)

With the help of divers on board the research vessel Alkor our scientists moored a sediment trap for long term measurements. Watch a film and read the article [here](#).

On board the research vessel

Alkor

Four days on the research vessel Alkor gave us the possibility to test and evaluate our sampling methods. Check out the article and film about the voyage on the Alkor. A lot of samples await their evaluation now.

Ocean Plastic Hub

A network for those interested in plastics in the ocean and aquatic environment.

Here you can find events, opportunities, reports and relevant information on challenges and solutions related to nano, micro and

macro plastics in oceans, rivers and lakes.

The hub is established by our partner Clean – The Danish Water and Environmental Cluster, and will foster further collaboration and exchange.

You can join for free [here](#).

Significant progress in the first year of PlastTrack

For the PlastTrack project, it is crucial to clearly understand our current standing and the value we can bring to ongoing research around plastic pollution. We know it is a growing issue, and micro- and nanoplastics have not been investigated thoroughly.

Read the article in [English](#), [German](#), or [Danish](#).

Upcoming Events

- 23-08-2024
Inauguration of our new national infrastructure
[NANOCHEM](#), Sønderborg
- 16-09-2024 [Climate neutrality conference](#), Sønderborg
- 6-10-2024
[NIBS conference](#), Tartu, Estonia
- 23-27-09-2024 [MICRO2024](#), Lanzarote
