

Door Collection

2019/20

J/B/Kind
DOORS

INSPIRATIONAL DOORS.
Undeniable value.

www.jbkind.com

WELCOME

Our 2019/20 Door Collection includes all the designs you've come to know and trust, plus some exciting new door styles and services.

The Osborne, Catton, Belton and Hardwick (pages 82-85) feature classic panelled designs with attractive flush mouldings that simply ooze refinement. White primed and ready for finishing, these doors are also suitable for another new service launching this year: our Colour Options Paint Service. We know how time-consuming painting doors can be – let us take the hassle away by delivering your doors professionally spray painted in whichever RAL colour you choose (page 9).

Speaking of convenience, also new for 2019/20 is our External Extreme Doorset offering (pages 118-119). Customers already love these exceptionally durable front doors, made with a top layer of MEDITE®TRICOYA®EXTREME. Now, fitting them has got a lot easier as they're available pre-hung as a doorset, complete with a solid white Accoya wood frame, plus high-quality fixtures and hardware.

Whatever your style and budget, from space-saving pocket door systems to easy-to-maintain Laminate doors, you'll find plenty to choose from in our Door Collection, now with a handy index for your convenience. Happy browsing!

Architects, Specifiers and Designers

Our dynamic door designs offer undeniable value as well as compliance with a wide range of UK and European industry standards. From fire protection and thermal insulation to renewable resources and disabled access, you can rely on JB Kind to provide the quality standards you need. We have recognised third party accreditation from schemes such as Certifire and FSC® chain of custody.

If you have any questions or need some expert advice, don't hesitate to call us on 01283 554197.

NEW Colour Options paint service

Add a touch of colour to your doors with our new Colour Options paint service. Look out for the icon against compatible doors. See page 9 for more information.

Our dedication to meeting the highest standards for our customers is illustrated by our continuous achievement of the UK quality award ISO9001. Certificate number: 1UK/01/5129491224

HOW TO CHOOSE YOUR DOORS

STEP 1

Choose your preferred door style

Browse through and select your favourite door designs, colours and finishes. Not forgetting, a matching glazed partner, should you wish to add some extra light. Take inspiration from our Gallery of lifestyle images online at jbkind.com

STEP 2

Check the sizes available

If one of our standard door sizes does not fit your requirements, check if a special size can be ordered through our **BS** Bespoke Options service, page 8.

STEP 3

Consider how the doors will be fitted

- Do you need any door pairs? If so, take a look at our Door Pair rebating service page 11.
- Would a Pocket Door System help create some extra space? Ideal for renovation and new build projects, see pages 12-15.
- Will you require any fire doors? Virtually all of our door designs offer an FD30 fire door option. See page 122.
- A pre-hung Doorset complete with frame and ironmongery could be better suited to your project. If so, see pages 10-11.
- Ensuites, wardrobes and cupboards often require a space saving solution. Consider a matching bi-fold option, pocket door system or invest in some sliding door tracking.

STEP 4

Pick the right handle

A stylish handle really does finish off a door. Take a look at our Door Handle Packs, pages 112-113, supplied with everything you need to fit a door.

STEP 5

Price up your doors

JB Kind's doors can be purchased through Builders Merchants and Door Retailer partners across the UK, any of which will be happy to provide a quote.

Either call us on 01283 554197 for details of your local supplier or visit our online Supplier Locator at jbkind.com. Alternatively you can Buy Online via one of our approved Online Partners and your doors will just be a click away.

Measuring up

To make sure you purchase the right door sizes, take the following measurements.

Door width: measure the top, middle and bottom of the door frame. The widest measurement determines the width of the door.

Door height: measure inside the vertical side of the frame. The longest length determines the height required. Remember to make allowance for any floor covering.

NB. You can plane door edges slightly to reduce the size. If required, please call us for details of the lipping size.

Door size conversion chart: A little help if you need to work out the metric and imperial equivalent for door sizes.

Height & Width

Metric (mm)	Imperial (inches)	Imperial (feet & inches)
1981 x 457	78" x 18"	6'6" x 1'6"
1981 x 533	78" x 21"	6'6" x 1'9"
1981 x 610	78" x 24"	6'6" x 2'0"
1981 x 686	78" x 27"	6'6" x 2'3"
1981 x 711	78" x 28"	6'6" x 2'4"
1981 x 762	78" x 30"	6'6" x 2'6"
1981 x 838	78" x 33"	6'6" x 2'9"
1981 x 915	78" x 36"	6'6" x 3'0"
1981 x 1067	78" x 42"	6'6" x 3'6"
1981 x 1168	78" x 46"	6'6" x 3'10"
1981 x 1220	78" x 48"	6'6" x 4'0"
1981 x 1372	78" x 54"	6'6" x 4'6"
1981 x 1524	78" x 60"	6'6" x 5'0"
2032 x 813	80" x 32"	6'8" x 2'8"
2134 x 915	84" x 36"	7'0" x 3'0"
2040 x 526	80 1/4" x 20 11/16"	6'8 1/4" x 1'8 11/16"
2040 x 626	80 1/4" x 24 5/8"	6'8 1/4" x 2'0 5/8"
2040 x 726	80 1/4" x 28 3/8"	6'8 1/4" x 2'4 3/8"
2040 x 826	80 1/4" x 32 1/2"	6'8 1/4" x 2'8 1/2"
2040 x 926	80 1/4" x 36 1/16"	6'8 1/4" x 3'0 1/16"

VISIT OUR SHOWROOM

Located in Swadlincote, Derbyshire, you are invited to touch and feel our products at first hand – we're sure you'll be impressed.

Recently refurbished, you will be able to view over 70 doors on display, including one of our double pocket door systems.

Please call 01283 554197 to make an appointment or complete our online showroom appointment form. Alternatively, we have many partners throughout the UK with our doors on display, so please consult us for the closest to you or visit our online Supplier Locator.

Builders merchants and door retailers

Our doors can be ordered from Builders Merchants and Door Retailer partners across the UK and buying your JB Kind doors is now even easier with our online Supplier Locator.

Just go to www.jbkind.com and put in your postcode to find the closest retailer to you – we also tell you which outlets have JB Kind door displays so you can take the time to go and experience just how fabulous our doors really are!

Buy online

If you already know exactly what you want and you like the ease of ordering online, then just pop onto our website and check out the buy online section with links to our approved Online Partners - then you're just a click away from receiving your dream doors.

NEED ADVICE?

Sometimes you'll need advice and we are always here to help. Just give us a call on **01283 554197** or email info@jbkind.com

Look for FSC® certified products

The mark of responsible forestry

FSC® Certified chain of custody door supplier

We hold our own FSC® chain of custody certification for certain doors within our collection. Chain of custody certification ensures that the systems within our business allow us to track the door from the day we buy it, through to the day we deliver it. Wherever you see FSC® Certified within a product description that door has been produced from certified materials and other controlled sources.

OUR SERVICES

Need to know more about our services or wish to order? Call 01283 554197 or email info@jbkind.com

Bs Bespoke Options

Whether you're self-building, renovating your home, purchasing for a development project or you're an interior design expert, you'll want to take a look at JB Kind's bespoke options. The versatility of our bespoke service is ideal for those special requirements.

Many of our door designs have bespoke options available. Look out for the **Bs** icon adjacent to product images.

TIMBER VENEERS

Perhaps you love one of the designs from our Door Collection but would prefer it in a different timber veneer or maybe you would like to create a style that is completely unique and different? More veneers can be viewed online at www.jbkind.com.

MADE TO MEASURE

There are a wide range of standard door sizes available, however, you may have a specific size requirement. Many of the doors from our collection can be produced to order as a special size and of course any door designs that are created just for you.

BESPOKE GLAZING

Whether you prefer a full glazed panel or smaller apertures, there are so many options for a glazed door. Clear, bevelled, diamond cut and etched are some of the most popular glazing types. Let us know what you would like to achieve and we'll advise on the options.

FIRE DOORS

JB Kind can supply bespoke fire doors, in a wide range of solid and glazed options. Fully certificated, so you can be safe and stylish.

For more information see page 122.

Catton, painted in RAL 5025 Pearl Gentian Blue

RAL 9010 Pure White

RAL 7044 Silk Grey

NEW Colour Options Paint Service

All the colours of the spectrum

Bring colour to your home and make a style statement by painting your doors any colour you like!

Painting doors can be fiddly and time consuming, so let us take the hassle away and arrange for your doors to be professionally spray painted prior to delivery. All you have to do is tell us your preferred RAL colour and we will do the rest.

Virtually all of our internal white doors and External Extreme range are suitable for this service – look out for the  icon as you browse through the brochure.

Note: Our painting service typically takes 3-4 weeks including delivery. Touch up kits are available to order. Colours shown are representative only. Please be aware that the appearance of RAL colours can vary depending on the paint surface and sheen level chosen. Subject to terms and conditions.

BENEFITS

Save time

No need to prepare (de-nib/sand) doors prior to painting and paint several coats on each side, allowing for drying time too!

Cost saving

Eliminate the cost of purchasing paint and equipment, plus labour if you employ someone to do the job for you.

Perfect finish

Spray painting gives a smooth factory finish without brush marks or uneven coverage.

Colour choice

You really can have any colour on the RAL spectrum. Even if you would like to stay with white, we will finish our primed doors for you.

Internal Doorsets

All of our internal doors, including fire doors, can be supplied as factory pre-assembled Doorsets. The perfect door solution for self builds, new housing and apartment developments.

What's in a Doorset?

- 1 Hinges fitted
 - 2 Door leaf
 - 3 Latch/lock fitted
 - 4 Frame/lining, complete with door stop
 - 5 Floor covering clearance
 - 6 Removable transport bracket
- Architrave is also supplied (not shown): available in a variety of styles

Here's a checklist of the key information that will be required to help us process your enquiry:

- Quantity required
- Structural opening heights and widths
- Wall depth
- Handing (left or right) as viewed from the pull side
- Floor clearance (distance from bottom of frame to bottom of door)
- Type of door - Standard (35/40mm), FD30/FD60 fire rated (44/54mm) or Security rated
- Door design style
- Frame material and finish - mdf or softwood in primed, lacquered or stained
- Frame type - rebated or lining
- Architrave profile and dimensions

 Fire rated internal doorsets are available for FD30 and FD60 Fire Doors

 Security rated internal doorsets are also available

Rebated Door Pairs

If you would like to fit a first-class door pair, we would recommend considering Rebated Meeting Stiles. Rebating means removing a section along the vertical edge of each door where they meet to allow them to fit snugly together, eliminating the small gap that you would see with square meeting stiles (two doors fitted side by side).

A number of door designs held within our stock ranges are suitable for rebating with a short lead time (see table below). This service is offered through our in-house joinery workshop. If your preferred door type is not listed, please check if our Bespoke Options service is available, as they could be made to order.

Doors that can be rebated into a pair from stock

Range	Door Designs
Oak Contemporary	Tigris Oak & Medina (sizes: 686 & 762mm)
Oak Classic	Dove Pairs (ready rebated)
Oak Shaker	All door designs (except fire doors & bi-folds)
Oak Cottage	Thames + glazed partners (except fire doors & bi-fold) Yoxall & Tutbury
Walnut	Axis
White Classic	All door designs (except fire doors)
White Contemporary	All door designs (except Parelo, Linea, Blanco & Ripple) Contact us for fire door options
White Shaker	All door designs (except fire doors & bi-folds)
White Moulded	Classique 6 Light Pairs (ready rebated)

POCKET DOOR SYSTEMS

*We always recommend using a professional fitter.

A pocket door system that enables doors to slide conveniently into a wall cavity and save space whilst looking incredibly stylish.

Easy to install* with a rigid frame, our pocket door systems are supplied pre-assembled so that they can be fitted in half the time of other brands.

Available for both single and double door situations in a selection of sizes, almost all of JB Kind's internal doors are suitable for use as a pocket door. You can also choose from a selection of pocket door accessories too!

Key features:

- Easy to install* rigid frame, supplied pre-assembled
- Fitted in half the time of other brands
- Designed for stud and plasterboard
- Door is fitted after all installation and decoration has been completed, avoiding any potential damage to your door.
- Door choice can be changed in the future without structural alteration to the wall.
- Compatible sliding door hardware available
- Available in single and double format

Pocket door cassette:

The cassette structure is made from 0.5mm galvanised steel, with the sides formed from single pieces of pressed steel which is corrugated for complete stability. Transverse ribs fixed to the corrugations further re-inforce the structure and allow fixing of plasterboard direct to the cassette. The internal pocket cavity is protected by a cover during installation.

Spacer bars:

Twin spacer bars are supplied that are fixed between the cassette and jamb during installation to ensure the structure remains square.

Specifications:

Suits door thickness 35mm with a maximum door weight 80Kg.

Mistral Walnut

How to order a Pocket Door System: Your step by step guide

STEP 1

Single or Double Pocket Door System

Use our size guide tables to check your requirements. For a double pocket door, you will need to purchase two single pocket door systems and a double leaf conversion kit.

STEP 2

Choose your door design

The majority of our door designs are suitable for use as pocket doors. However, some doors that have raised mouldings and 44mm fire doors are not suitable. Please get in touch if you're in any doubt.

STEP 3

Timber accessory kits

You will need an accessory kit as the pocket door system cannot be installed without one. Choose from either white primed or varnished oak, available for both single and double options.

STEP 4

Door Grooving

The bottom edge of the door will need to be grooved to fit in the floor guide of a pocket system.

If required, our in-house joinery workshop can pre-groove your doors prior to delivery, for a small charge.

STEP 5

Optional accessories

Automatic Door Closer: is a self-closing system that enables the door to glide into place automatically after being opened.

Double simultaneous operator: enables a double pocket door to open and close simultaneously.

Soft-close damper unit: applies a brake making sure that the door moves slowly and smoothly to a close.

STEP 6

Door furniture

Choose from either a bathroom privacy lock or flush door pull.

STEP 7

Finding a JB Kind door supplier

Take a look at the Supplier Locator on our website or approved Online Partners.

Once you've chosen a place to purchase from, then just hand over all of your requirements and your doors and pocket systems should be with you in no time!

If you do have any questions, our expert JB Kind team is on hand to help you out, just call **01283 554197** or email **info@jbkind.com**

Timber Accessory Kits

Available in either white primed or varnished oak, Accessory Kits are required to complete pocket door installation.

Single pocket door kit (shown in oak)
Includes: 2 x cover moulds with brush seals, header cover and jamb with seals

Double pocket door kit (shown as white primed)
Includes: 4 x cover moulds with brush seals and 2 x header covers

Code	Description
SGLWPRIAC	White primed - single pocket door kit
DBLWPRIAC	White primed - double pocket door kit
SGLVOAC	Oak varnished - single pocket door kit
DBLVOAC	Oak varnished - double pocket door kit

Additional Accessories

Code	Description
SCDAMPER	Soft close damper unit

 FD30 Fire door

Painted Finish

A close-up photograph of two brushed metal door handles mounted on a dark grey door. The door has a realistic wood grain texture. The handles are curved and mounted with circular backplates. The lighting is dramatic, highlighting the metallic sheen of the handles and the texture of the door.

Painted finish doors use state-of-the-art technology to create realistic timber graining in a choice of colours – achieving a perfect, uniform look.

Pintado Grey

Ardosia Glazed

Argento

- Finish:** Painted mid-grey (Pintado & Ardosia) and dark grey (Argento) finishes with vertical grain
- Style:** Pintado: Plain flush
 Ardosia: Flush with grey coloured grooves
 Argento: Flush with silver coloured grooves
- Glazing:** Clear flat safety glass with raised beading
- Other:** FD30 fire doors
 FSC® Certified (Argento)
 If trimming is required the door edges will need retouching. See website for colour match information.

Important:

Moulded panel doors are vulnerable to high humidity. Make sure plasterwork etc. has been allowed to dry out sufficiently before fitting them in new or refurbished homes.

- Finish:** White primed grained effect
- Style:** Moulded panel
- Glazing:** Clear flat safety glass with flush beading
- Other:** FD30 Fire doors
FSC® Certified
Pairs: rebated meeting stiles, right hand open away

Useful Tip:
For a better finish on any primed door we recommend a light sanding to remove any nibs or marks prior to finishing.

Important:
Moulded panel doors are vulnerable to high humidity. Make sure plasterwork etc. has been allowed to dry out sufficiently before fitting them in new or refurbished homes.

- Finish:** White primed grained and smooth effect
- Style:** Moulded panel
- Glazing:** Canterbury 2 Light & Bi-fold
Grained: etched flat safety glass with clear diamond pattern lines and flush beading
Smooth: clear flat safety glass with flush beading
Canterbury 2 Light FD30: Clear flat fire glass with raised beading
- Other:** FD30 Fire doors
FSC® Certified

DOOR HANDLE PACKS

Door Handle Latch Packs the perfect partner for your JB Kind doors

Enjoy the convenience of a stylish door handle latch pack, supplied with everything that you need to fit your door in one box. Each pack comes with a pair of handles, a smartlatch, a choice of keeps and three quality stainless steel ball bearing hinges.

SMARTLATCH

The Smartlatch is an innovative latch that can be quickly installed in less than 5 minutes, saving tradesmen up to 25 minutes per door.

Smartlatch: Fit in under five minutes

Step one: Using a 25mm drill bit, bore out to 75mm in depth.

Step three: Then simply insert the latch.

Step two: Using the same bit, drill the hole for the spindle.

Step four: Fit handles.

Privacy latch packs with revolutionary push button, available in all handle styles. No requirement to purchase or fit a separate bathroom lock.

With a 10 year parts and mechanism guarantee, the premium stainless steel and zinc diecast construction provides that all important peace of mind.

PLEASE NOTE: the hinges provided in our latch packs are not suitable for use with fire doors. Fire door hinges are available separately, call 01283 554197 for details.

Tigris Glazed Extreme, shown painted

Constructed with an exceptionally durable top layer of MEDITE®TRICOYA®EXTREME and sealed with a factory applied paint finish, External Extreme doors can withstand the toughest weather conditions.

All External Extreme doors are:

- Weather resistant
- Supplied with a 10 year guarantee
- Suitable for fitting in a day!
- Supplied with a weather bar
- Available as a pre-hung door set
- Perfect for over painting

Please refer to jbkind.com for further details

Flexible purchase options:

Option 1: purchase an individual pre-finished door leaf with weather bar (see pages 116-117)

Ideal for when you're fitting into a new or existing door frame. Prefer a different colour to white? Ask about our  Colour Options service.

Option 2: choose an External Extreme Doorset (see pages 118-19)

Supplied pre-hung in a solid Accoya wood frame with all hardware and accessories fitted. Door leaves can be painted with our  Colour Options service, if required.

NEW Colour Options paint service

Front door colours are very much a personal choice. External Extreme doors are supplied pre-finished in white but can be easily over painted, should you wish to achieve a specific colour.

Let us take the hassle away. Tell us your preferred RAL colour reference and we will arrange for your door to be spray painted with a quality exterior finish.

EXTREME MEDITE tricoya

Traditionally used for cladding and facias, MEDITE®TRICOYA®EXTREME's hard-wearing and weather resistant properties make it perfect for use within the structure of external doors.

DURABLE
Longer lasting, perfect for external use.

SUSTAINABLY SOURCED
FSC® Certified. Wood used from sustainable sources.

LOWER MAINTENANCE COSTS
Extended periods between exterior coatings maintenance.

PERFECT FOR COATING
Improved stability and durability enhances service life of the coating. Damaged coating will not affect the core.

ENHANCED STABILITY
Swelling and shrinking dramatically reduced.

RESISTANT TO FUNGAL DECAY
Effective barrier to fungal decay.

Colour Options Service

External EXTREME Pre-hung Doorsets

Our External Extreme Doorsets are designed to withstand the toughest weather conditions with the strength and durability of our MEDITE®TRICOYA®EXTREME faced door range combined with an ACCOYA solid wood high performance door frame.

Extreme Doorsets are supplied factory finished in a white exterior paint as standard. Our Colour Options service can pre-paint individual door leaves (not door frames) any RAL colour. Alternatively, the doorsets are easy to over-paint in a colour of your choice, once in situ.

Each Doorset frame is made to measure, pre-hung with your Extreme door, complete with all hardware and accessories. Ready for easy installation and backed by a 10 year manufacturing defect guarantee.

BENEFITS OF A DOORSET

Save time
Each Doorset is pre-hung and ready to install.

Labour cost saving
Quicker fitting times help reduce onsite costs.

Single sourcing
Ease of purchasing all door related components in one place.

Factory controlled
Each Doorset is assembled in a factory environment to ensure consistency and quality.

Optional doorset accessories:

External Extreme Doorset features:

- 1 Solid Accoya wood door frame (supplied factory finished in white)
- 2 MEDITE®TRICOYA®EXTREME faced door (supplied factory finished in white, ask about our Colour Options service)
- 3 Chrome door handle (supplied as standard)
- 4 3-Point locking mechanism
- 5 Chrome security cylinder
- 6 Stainless steel standard grade-13 hinges
- 7 Silver stormguard weather bar
- 8 Silver stormguard threshold

Oak Door Linings, Architraves and Skirtings – Boxed Sets

Constructed with a solid engineered core and faced with oak veneer. Each set is sufficient for most standard door sizes, available both varnished and unvarnished.

Contents per box:		
sufficient for one side of a door		
2 jambes 1 head		
2 corner blocks 2 plinth blocks		

For a perfect finish...

MANN'S

Applying a quality finish to your internal doors ensures their long term appearance and performance.

We recommend the following finishing products that have been tested on our unfinished oak internal doors with excellent results.

Clear, water based varnish that is available in 4 sheen levels.

All-in-one natural hard wax oil that dries to a natural, clear matt finish.

Please refer to www.mannsuk.com for more information and to purchase these products directly.

Essential Door Care & Maintenance Advice

The principal enemy of timber doors is excess exposure to moisture or dryness. Having left our custody, we have no control over the conditions to which they are subjected and to avoid any subsequent cause for disappointment, we strongly advise the following advice is heeded. If suitable care and treatment is not taken to prevent the free passage of moisture either into or out of the wooden door, stresses within timber may be released resulting in movement or distortions such as swelling, shrinking, warping, splitting, twisting or even discolouration. We are unable to accept any liability for any failings where they have arisen due to the free passage of moisture.

Storage

Upon receipt, check your doors carefully for condition and suitability, as claims made later may not be considered. Please store doors laid flat, fully supported off the floor with at least three full width bearers of the same dimension in a dry fully ventilated area, with protective packaging intact. Doors supplied unfinished should be thoroughly sealed on all faces and edges prior to the commencement of any joinery work, although first sizing them may be to advantage. We recommend that veneered doors are sealed using Manns Extra Tough Interior Varnish or Manns Door oil.

Wood finishes

There are numerous brands on the market and we fear many are formulated to achieve a low market price rather than quality. We have tested Manns Extra Tough Interior Varnish and Manns Door Oil which have produced excellent results. For this reason we strongly recommend the use of one of these two finishes to help protect the guarantee. Either of these two finishes will provide a lasting seal between component parts. Good quality solvent or acrylic finishes may be used, but check they are suitable for use with timber laminates or veneers. Follow the treatment manufacturer's instructions carefully and avoid over applying the treatment, particularly the first coat.

We recommend keeping a copy of the claims made for the product in the event it fails to perform. It is vital all finishing systems are applied equally to both sides and edges at the same time. Rapid changes in ambient moisture are extremely detrimental especially when unbalanced.

Natural oils such as Danish oil, tung oil and linseed oil are not suitable for use with any of our products. These solutions are penetrating oils and are not suitable for use with veneered doors. The application of a base coat stain or paint primer alone is not deemed to form a seal. Failures related to treatment will be assessed based on their application and the claims made by their manufacturer.

Installation

Check the door for suitability prior to commencing work. Claims made later may not be considered. When trimming doors, reduce them equally and not excessively from the top and bottom for height, to the hanging edge only for the width,

if minimal, but equally with the meeting edge if a greater amount is necessary.

Recesses for hinges (3 No. 75mm internal, 3 No. 100mm external) and mortises for latch / locks etc. should be cut to the minimum recommended sizes. Panel door mortises should not be located at rail joints as this may significantly weaken them. On completion remove doors, taking off all ironmongery and treat every cut / untreated surface liberally with a number of coats of an appropriate treatment before finally refitting. Remember to pay particular attention to all edges of your door, particularly any exposed end grain where the propensity for the free passage of moisture is much greater.

Installation - Fire doors

When fitting our FD30 fire doors, please note that there are strict limitations about how much they can be trimmed and these must not be exceeded. Ironmongery used in the installation of fire doors must be strictly in accordance with the door's certification and appropriate for use with a fire door.

Internal door specific

We strongly advise against the installation of all types of timber doors into a building with recent plastered or screeded areas. Wet sites with enclosed unheated buildings represent extremely detrimental environments and must be thoroughly dry, without condensation, before doors are introduced. Even our pre-finished doors should not be exposed to inappropriate damp site conditions.

External door specific

Even in times past, it was never advisable or intended that timber entrance doors be fully exposed to the worst elements of our climate, even if well coated. A South / South Westerly elevation is the worst direction for the prevailing weather and exposure to the hottest sun which can seriously degrade external doors.

We recommend they are set back from the front face of the building or covered by a canopy or porch way projecting not less than about 1.5m,

regardless of elevation. Always fit with a suitable weatherboard regardless of frame cill type fitted, to prevent droplets of moisture hanging from the door bottom.

Future maintenance is most important to retain good appearance over many years and we recommend washing down with warm water and detergent every two to three years and re-coating.

Quality standards

All external and internal doors are supplied in accordance with BS EN 942:2007 "Timber in Joinery General Classification of Timber Quality", BS 5278:1976/EN25:1975 "Doors measurement of Dimensions and of Defects of Squareness of Door Leaves" and BS EN 951:1999 "Door leaves. Method for measurement of height, width, thickness and squareness".

Any claims against warranty relating to manufacture will be assessed strictly in accordance with the criteria contained within.

Any claims against warranty relating to storage, handling or installation of any of our doors will be assessed against guidelines contained within BS8000 part 5:1990 and British Standard Code of Practice CP151. JB Kind Terms and Conditions of Trading apply.

Safety Glass

To comply with building regulations all our pre-glazed doors meet the requirements of the European standards.

IMPORTANT

Wood is a natural material and variations in colour and graining should be expected. Note: With door pairs we cannot guarantee an exact veneer match.

Colours depicted are representative only and are reproduced as accurately as the printing process will allow.

We reserve the right to make alterations or modify specifications without notice. Errors and omissions excepted.

FIRE DOORS

Fire doors are a serious business, and that's why we invest our time, energy and money to ensure that we have one of the most comprehensive, and accredited, collections of fire doors in the UK.

As responsible suppliers of fire resistant doors, we ensure that all of our FD30 doors have been tested in accordance with either the British BS476 pt22 or European EN1634-1:2000 standards.

All of our fire doors have a Fire Test Assessment report which is available upon request and outlines in detail exactly what you can and can't do when fitting any particular door. All fire doors are glazed with fire-rated glass.

FD30 fire door pairs: please note that not all FD30 fire doors offered within this brochure are certificated for use as pairs. Please contact us for more information.

For more information on fire doors, including details on Glazed Fire Doors & Part M (Mobility) visibility requirements, log on to jbkind.com or call 01283 554197.

Certificated Fire Doors

Fire doors certificated by Warringtonfire are identified by  Certifire FD30 Fire door. JB Kind's membership of the BWF Fire Door Alliance Scheme supports the promotion of third party certification.
