# ProVide is a user-friendly software solution for secure handling of files & information

PROVIDE MAXI - PROJECT WORKPLACE

**Share, receive, collaborate, and edit files on company servers**
Allow internal and external users to securely share a project folder where they can work together through a link. ProVide even lets users edit files from the web.

PROVIDE - MEDI & MAXI SFTP FOR BUSINESS & EDI

SFTP Server that integrates with business systems and AD
ProVide Server offers excellent integration, event scripting and virtual user capability, enterprise grade AD-integration and resource accessibility. Compatible & secure.

PROVIDE - MINI TFTP FOR IOT

Next level TFTP Server with multiple accounts
ProVide allows multiple TFTP accounts being separated by source IP and netmask, effectively creating account setups with different files and upload/download locations.

WHY USE PROVIDE?
Powerful, Easy to Use & Secure

ProVide Server is an easy to use, secure file and information sharing solution mitigating the need for ad-hoc sharing solutions. Make document and file management easy to use and completely secure in your own private cloud. ProVide allows users to do their job and for IT to keep track of inbound and outbound information by offering a solution superseding all others.

ProVide includes both the web interface but also FTP/FTPS, SFTP and TFTP with the highest security standards possible. Using powerful scripting, virtual users and event engines for integration; ProVide is for many small, medium and large enterprises the preferred solution for communication, EDI and the secure management of files.

PEACE OF MIND
Easy to set up. All data transfers are encrypted.

USEABLE
User-friendly ad-hoc file sharing solution.

GDPR READY
GDPR compliant via encryption and logs.

MULTILINGUAL
10 languages, Unicode and UTF-8 supported

ProVide Server

THIS IS WHAT YOU GET

Smart solutions for data and information management

Solutions range from the 'MINI' to 'MEGA', making it easy for you to choose the edition that suits you best. All editions include support for unlimited accounts and connections. Licenses are issued as annual subscriptions per server or per user and may be complemented or extended at a later point in time.

MINI – Unencrypted file transfer, 5 user licenses free for non-commercial use.

MEDI – MINI + Encrypted file transfer and built-in web client interface. Edit any file at the source.

MAXI – MEDI + share, receive and collaborate. Business systems integration with advanced API's.

MEGA – MAXI + unlimited installations with 40h initial setup and configuration.
