New Development

Material, Process, Testing

NEW DEVELOPMENT:

(Additional Services)

We help start up your own production or connect you with a suitable manufacturer.

Together with you we develop strong and green materials or applications. We supply you with prototypes, offer comparison tests and return of investment calculations.

We filter the market to find the right material and process. We buy material and equipment to protect the product and process before patent.

PJ CONSULTING AB

STRONG & GREEN
products with optimized
chemistry, process
and design.

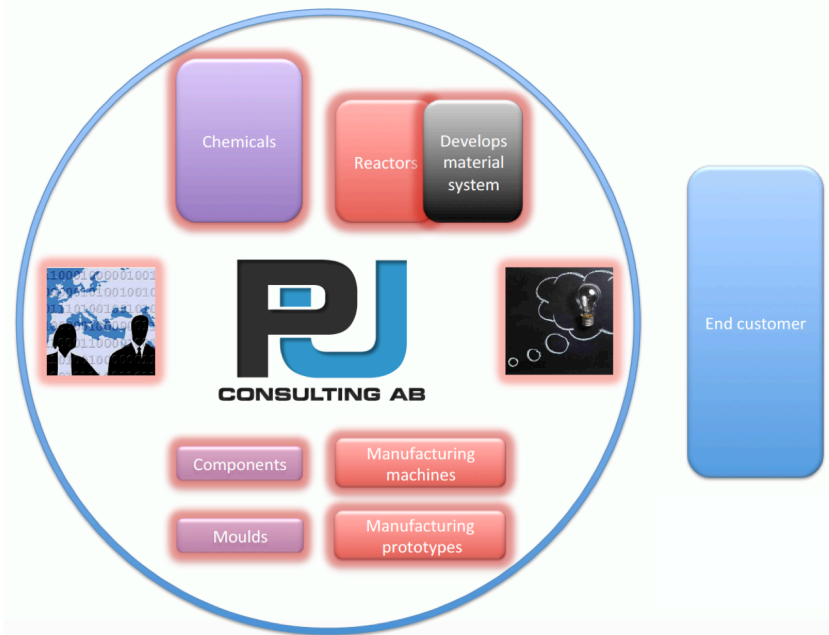

STRONG:

PU Consulting AB measure the quality on your existing products, process and design. We offer stronger alternative materials and new techniques with more effective process and design. The purpose is to increase your quality.

GREEN:

We focus on green materials and cooperate with partners about the latest technology to optimize the final characteristics. Consequently, we contribute to reduce global warming.

Network

EXTENSIVE NETWORK
