

ARIES

ARIES SCREEN

MAIN FEATURES

- Fully pneumatic operation, for the safe use of flammable and non-flammable products, including water.
- Dedicated brush for manual washing, powered by a pneumatic pump.
- The rear side has an optimally calibrated system to be able to connect an adequate suction system, which takes place via the Venturi system, but can be connected to any suction system.
- Exhausted solvent discharge device through dispensing gun, allows the operator to transfer the solvent safely, avoiding dangerous spills.
- The tank is completely built in AISI 304 steel
