16 Wetstreet and
Lambermontstreet Brussels
- ▶ **Construction period:**
April – October 2016
- ▶ **Contract value:**
D1 Class 2

WORKS FOR THE UPDATE OF INDIVIDUAL SAFETY IN AND ON THE RESIDENCY AND OFFICE OF THE BELGIAN PRIME MINISTER

For quite some time, there was a discussion of performing works inside the Belgian residential buildings, because after an at the time performed audit, it has been revealed that the two above mentioned houses, the heart of the Belgian Government, were absolutely insufficiently protected. Following this audit it was far too easy to penetrate these buildings.

After a public price request, ELR ([RAMAST Group](#)) could count on an order for a part of the works, among others to dramatically sharpen the protection.

The works truly originated from the terror threat and for obvious security reasons it is impossible to go into the detailing of the protection works themselves.

Beside the thorough renovation of the lobby of Wetstreet 16, behind the gate, the job also included mainly the installation of new bullet proof and burgler proof inner and outer doors and ditto windows, special insulation and glazing, the installation of security portals, cameras and alarm systems etc...

During the works at all time safe access for the politicians and government officials had to be guaranteed.
