

## PROJECT : OLYMPIA HERFELINGEN

### Client:

Olympia LTD CY  
1540 Herfelingen

### Design:

AR-TE B-3018 Leuven  
STABO B-3018 Leuven

### Project data:

Steenweg naar Asse 183  
1540 Herfelingen

### Construction period:

2015

### Contract value:

D Class 3

### RENOVATION AND REFURBISHMENT WORKS AFTER FIRE

The dairy factory Olympia at Herfelingen was hit in February 2012 by a serious fire in the dessert department. Caused by a short circuit in the cooling room of the laboratory, the fire spread to the production hall and storage halls, but thanks to the installed compartments at the construction and the concept of the buildings only one wing became unusable for the production. In the adjacent factory entities the smoke production of the burned sugar also caused considerable soot damage.

RAMAST LTD was charged with the dismantling and repair works in order to fully restore the hit factory parts and make them operational again, together with a co-ordination mission for the technical equipments.

Performed was the entire cleaning of the adjacent storage hall of 1.000 m<sup>2</sup>, inside and outside, and the complete renovation of the hit inner decorations and finishings. Further unusable fireproof elements, such as gates and doors were also replaced.

Finally also a cooling cell of 1200 m<sup>2</sup> was completely rebuild (sandwich panels, gas tight cooling lift door, cooling ceilings...).

RAMAST = TAILORMADE CONSTRUCTION
