

PROJECT : TORENHOVE GHENT

RENOVATION OF SANITARY INSTALLATIONS

The Torenhove building is a square complex of one to two building layers with a closed courtyard. Previously the former stables and the coach house were its oldest parts who about 1900 were closed with an eclectic neostyle wing. During the years many construction alterations were performed on these buildings in order to improve their building physic condition.

With a view on reconversion into offices and space for management companies Ramast Ltd Constuction Cy obtained the order to construct a brand new sanitary in the existing rooms. **RAMAST LTD CONSTRUCTION CY** performed this overall project in a limited construction period and taking into account the unknown factors specific for renovation work in historical houses.
