## Tokenomics Remint Network

### Token Overview

- **Name:** Remint (RMT)
- **Blockchain:** Solana
- **Max Supply:** 1,000,000,000 (1 billion)
- **Method of Sale:** Pump.fun initial release which then moves over to Raydium with a locked liquidity pool. We will directly purchase 60% of the total supply from pump.fun on release to reserve it for our tokenomics.

---

### Token Allocation

Category	Percentage	Token Amount	Details
<b>Public Sale (Initial)</b>	<b>40%</b>	400,000,000 tokens	Tokens listed directly on pump.fun > raydium
<b>Community Incentives</b>	<b>30%</b>	300,000,000 tokens	Incentivize token holders to stake and earn rewards.(includes pre-mined supply)
<b>Development Fund</b>	<b>10%</b>	100,000,000 tokens	Used for platform development, marketing, advertising, partnerships and ecosystem growth.
<b>Founders &amp; Team</b>	<b>10%</b>	100,000,000 tokens	Allocation for founders, team, and early contributors (vesting schedule applies).
<b>CEX Listings &amp; Liquidity</b>	<b>10%</b>	100,000,000 tokens	Reserved for centralized exchange listings and liquidity provision.

---

### Key Token Uses

1. **Staking and Rewards**

- Token holders can stake Remint tokens on the platform to earn staking rewards.
  - Staking & mining rewards are distributed from the **Community Incentives (30%)** allocation over time.
2. **Booking Hotels and Flights**
    - Users can use Remint tokens to book hotels and flights at partnered platforms, incentivizing real-world adoption.
  3. **Apartment Rentals**
    - Tokens can be used to rent apartments on the platform, creating a direct utility for users.
    - **Earn Tokens:** Users listing apartments for rent will receive payments in tokens.
  4. **Real Estate Transactions**
    - Enable users to buy and sell real estate with Remint tokens, streamlining transactions and reducing fees.
  5. **VIP Perks**
    - Access exclusive perks (discounted flights, luxury hotels, etc.) by holding and using a certain amount of tokens.
  6. **Loyalty Rewards (Prepaid Debit Card)**
    - Offer a Remint prepaid debit card with loyalty rewards tied to token usage.
  7. **Transactions**
    - Facilitate seamless sending, transferring, and depositing of tokens into user accounts on the Stellar network.
- 

## Vesting Schedule

- **Founders & Team (10%)**
  - Locked for 12 months, followed by a gradual release over 36 months to ensure commitment to the project.
  - Prevents early sell-offs and aligns with long-term project goals.
- **Staking Rewards & Ecosystem Incentives**

- Released over 4–6 years to maintain long-term engagement and incentivize participation.
- 

## **Initial Token Release Plan**

- **Public Sale (Initial):**
    - Start with 400,000,000 tokens (40%) listed directly on pump.fun > raydium
    - Forever locked liquidity pool
- 

## **Why This Tokenomics Works**

### **1. Pump.fun to raydium initial release:**

- Releasing on pump.fun is a safe way to launch our token due to no ICO rounds. Pump.fun is mostly used for meme coins. But not in our case. The team will purchase 60% of the 1 billion tokens created on pump.fun and reserve them for our tokenomics. We will then move to Raydium and provide a liquidity pool before moving on to other major exchanges.

### **2. Incentivized Ecosystem Growth:**

- 30% community incentives ensure user engagement and platform adoption.
- Approx 100,000,000 of the community incentives is the pre-mined supply of all reminters who are waiting to withdraw (10%) of the total max supply which leaves 20% community incentives left for rewards such as staking, loyalty programs etc. The community incentives also increases from in-app fees.

### **3. Funding for Development and Marketing:**

- 10% allocation to the development fund ensures sufficient resources for scaling and operations.

### **4. CEX and Liquidity Readiness:**

- 10% allocation for centralized exchange listings guarantees tokens are available for partnerships and liquidity provision.

### **5. Founders' Commitment:**

- 10% for the team, with a strict vesting schedule, signaling dedication to long-term success and trustworthiness.

---

## Summary of Benefits

1. **Use Case-Driven Demand:** Token use cases (staking, real estate, booking services etc) create organic demand.
2. **Flexibility for Growth:** Reserve tokens allow us to adapt to market needs and expand availability gradually.
3. **Trust and Transparency:** Vesting schedules for founders and a well-documented token allocation inspire confidence among investors and users.
