

Supported Living Services

ABOUT US

At Rising Star Care Solutions, we believe in living a life with meaning and achieving our full potential. Consequently, individuals with mild to moderate learning disabilities and persistent mental health issues are not exempt from living ordinary and fulfilling lives.

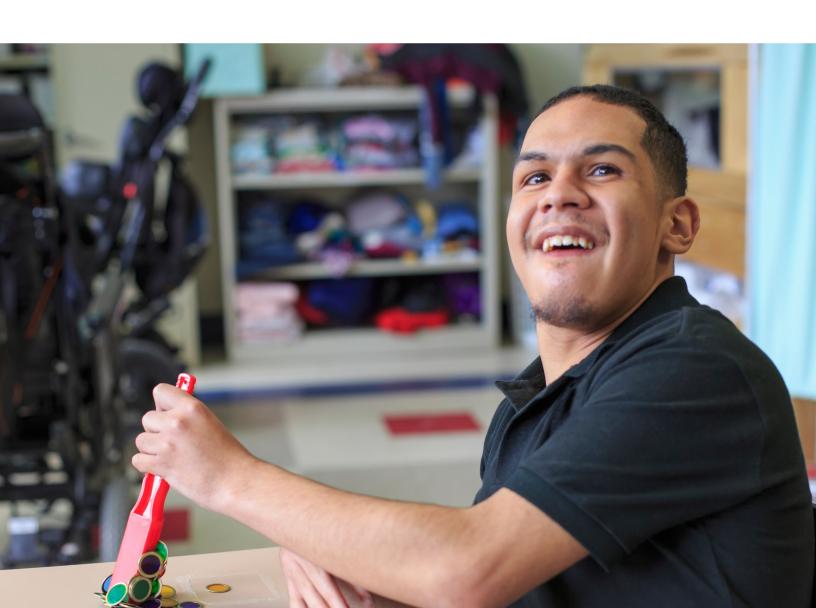

We therefore provide such individuals with supported housing. We will assist you in living the life you desire, in which every day can be different. Our staff knows how important it is to treat each person as a unique person with different goals and interests.

We will assist you in achieving your personal aims and objectives by creating a personalised plan with you so that you can continue to receive the appropriate community-based assistance.

WHO WE SUPPORT

We support adults aged 18 and up and families affected by the following conditions:

Mental Health Needs

Individuals with moderate or mild mental health issues who come to us are eligible for our complete mental health rehabilitation services.

Our key objectives are to make individuals feel better about themselves and to improve their emotional health. We have a great group of qualified support workers who are used to helping people with schizophrenia, personality disorders, and many other mental health problems.

Learning Disability

We support people with learning difficulties ranging from mild to moderate to severe. We are fully aware that every person has a unique set of requirements and, as a result, our support programmes will be individualised so that they may cater to the requirements of each individual.

Our tailored help emphasises self-determination, active involvement, and improved quality of life.

Autism

We help those who have been diagnosed with autism spectrum disorder (ASD). Our staff makes an initial "autism profile" so that we can make sure each person with autism gets the services they need.

This test also helps us figure out how complicated a person's illness is, which can be very different from person to person.

Physical disability

Individuals with mild to severe impairments, as well as those with multiple disabilities, can obtain support from us.

Our support staff will give the right amount of help, which may include aid with mobility, personal care, and communication. Other activities may also be included in this help.

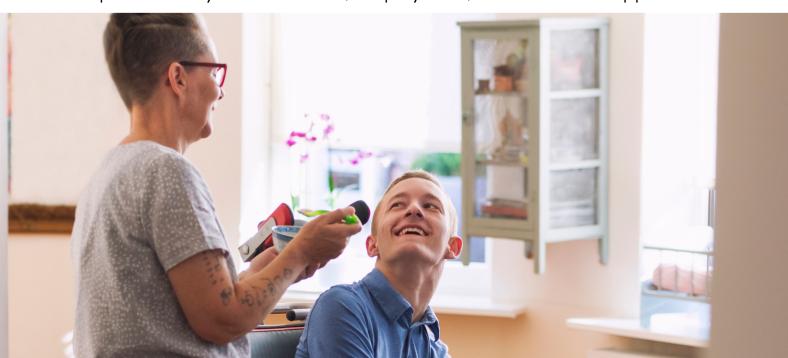

OUR PLANS OF SUPPORT:

Our clients are the focal point of all that we do. As we collaborate with them, we determine how best to assist each person in being as independent as possible in their own home and community. We also consider the opinions of their families and any professionals who may be assisting them. Each individual is supported by a specialist support worker who has been trained to meet their specific needs.

We make every effort to ensure that our team members complement one another. This promotes positive and trustworthy relationships. When clients receive tailored assistance from individuals they know and trust, they gain confidence.

There is support available from a few hours per week to 24 hours per day, seven days per week, including individual assistance. In a variety of ways, we assist individuals in making their lives richer and more fulfilling. Included among them are the following:

- Participation in the community
- Cooking, cleaning, and grocery shopping.
- Personal care
- Assisting with benefit claims and managing them
- Having access to entertaining and social activities
- Keeping in contact with family and friends while establishing new relationships
- Motivating individuals to live healthy lives.
- Utilising medications
- Budgeting and managing money
- Help locate daytime activities, employment, and volunteer opportunities.
