SAMTECK
CARE SOLUTIONS LTD

ABOUT US

Olushola Samuel Fowowe founded SamTeck Care Solutions in 2013 with the vision to support and care for service users who required in-home care as opposed to institutionalised care.

SamTeck Care Solutions is committed to the highest standards and quality of care, with a multidisciplinary approach that places you and your loved ones at the center. We work hard to encourage people to live healthy lives so that they can have the best quality of life possible in the community.

SamTeck Care Solutions hires people with the skills, knowledge, and certifications needed to help people with conditions like dementia, Parkinson's disease, and Alzheimer's disease, among others.

Our care team provides a level of quality and attention to your needs that will result in recognition for excellence. In addition, all of our managers and team leaders have nursing and/or vocational degrees, as well as extensive experience serving individuals with a more complex range of needs. We will keep investing in staff development so that we can meet the needs and wants of people.

OUR LIVE-IN CARE SERVICES

Our live-in care enables you or a loved one to live the remainder of your life in comfort and independence in your own home.

A live-in carer provides a safe environment in the family home, which allows you to enjoy a consistent daily routine.

You receive individualised care in familiar surroundings, enabling you to keep your preferred way of life. The garden, your pets, and your neighbours offer you a sense of belonging and safety.

We tailor a care plan to your or your loved one's lifestyle and assess it frequently as your needs evolve. We ensure that you, your loved ones, and your healthcare providers all agree on the care plan.

You maintain ultimate control over your lifestyle. After experiencing live-in care, the majority of individuals conclude that there is no compelling reason to leave their home for residential care. They can be cared for and supported for a long time after a health crisis, allowing them to live their final years in privacy and dignity with the help of expert home care.

We are aware that your home serves as your stronghold. We support your authority by never taking over and always allowing you to be in charge. We support your choices and permit you to run the home in accordance with your judgement.

LIVE-IN CARE FOR A COUPLE

Your spouse and you can live together.

Imagine being forced to live apart from your spouse after decades of wedded bliss!

With SamTeck Care Solutions Live-In Care, you and your spouse may continue to live at home.

The quality of life of individuals is governed by their relationships. The more they are able to maintain their relationships, the happier they will be.

THE HIGHEST LEVEL OF CARE

Live-in care provides the finest level of long-term care due to its one-on-one nature. Every day, our carers record any behavioural or health changes in your loved one. Only live-in care provides close supervision by individuals who know you well. This type of health monitoring is not feasible at an institution due to high personnel turnover.

Respite Care

Providing care for a loved one can be demanding. Respite care gives caregivers a well-deserved respite.

Respite care services enable you to take a break from caring for an elderly family member. Caring for a loved one may be a luxury and a source of great joy, but it can also be a significant amount of effort.

Caring for a family member can bring people closer together, but it can also make you tired physically and mentally.

To prevent burnout, it is essential to take frequent breaks, whether it be a few hours every week or a much-needed respite.

Respite care enables you to relax, restore your physical and mental vigour, and retain a feeling of equilibrium in your life.

Palliative Care

The provision of palliative care in your own home allows you to conclude your life in a familiar and comforting environment.

As a consequence of medical breakthroughs, most of us now live for longer periods of time before passing away. This allows us to make plans and discuss with our loved ones how we would like to be cared for as we approach the end of our lives.

Despite this, studies indicate that the majority of us continue to die in clinical settings within hospitals, contrary to how most of us would desire to end our lives.

We want to make sure that this doesn't happen and that receiving end-of-life care in the convenience and security of your own home improves your quality of life as much as possible.

As part of our palliative care services, we will collaborate with you, your loved ones, and your primary care physician to plan your end-of-life journey. During this process, we will also give you and your family the advice, support, and care that you and they need to reach your goals.

Night Care

Night care is when a carer remains overnight in your home to assist you in maintaining your daily routine. Night care provides round-the-clock access to qualified specialists who can assist with even the most complex care requirements. Care requirements do not finish at the end of the day.

Our nurse-led carers can also help you or a loved one at night, so you or they can sleep peacefully.

If you or a loved one feel uncomfortable being left alone at night, you may need night care. Evening care provided by one of our highly trained carers entails assistance with restroom breaks, medication administration, and sleeping position changes.

Domiciliary Care

Domiciliary care, which is sometimes called "home care," is given to people who live on their own but need help with daily tasks.

A professional carer will visit your home to assist you with activities of daily living such as light housekeeping, personal care, food preparation and cooking, and any other task that will allow you to maintain your independence and quality of life. Additionally, home care allows a loved one's family caregiver to take a much-needed respite.

Specialist Care

SamTeck Care Solutions is a provider of in-home care services, with competence in specialist care. We are motivated by a deep and enduring desire to do all possible to improve the quality of life for individuals whose lives are touched by a variety of medical conditions and illnesses.

Our staff of highly experienced carers and nursing experts cares for patients with exceptionally extensive and intricate care requirements.

Whether you or a loved one are young or elderly, able-bodied or not, we tailor the care services we provide to match your or their needs and goals. As a matter of course, we recognise that conditions may change in an instant, which is why we are also able to provide coverage 24/7, 365 days a year.

Our Complex care includes:

Catheter, Bowel, and Stoma Care

The requirements for continence may vary greatly. If you or a loved one requires additional support with catheter, bowel, or stoma care, our caring and diligent caregivers are here to assist you.

Tracheostomy care

Our specialised care teams have received specialised training in order to provide tracheostomy care to patients who have recently been fitted with an airway assist.

Nasal and gastric feeding care

We offer care to people who use nasal and gastric feeding

Do you seek quality care and support of ? You are at the correct place!
