1. Check the Qty of components according to packing list or parts list.
 2. Check the Qty of materials according to parts list.
 3. Check if there is damage on the surface of product components or not.
 4. A grounded outlet needed as recommended to use at least 16A with a fuse of the leakage protection switch.
 5. A professional personnel or electricians is needed when installing electrical components.
- If can not satisfy above conditions, please stop installing immediately and contact the dealer.

Technology parameters

Rated Voltage: AC230V

Rated Power: 3020W

Rated Current: 13.2A

Rated frequency : 50~60HZ

Insulated Resistance: >20MΩ

Waterproof grade: IPX4

Safety grade: I

Load parameter

Up heater : AC230V/200W

Down heater : AC230V/250W

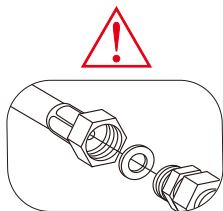

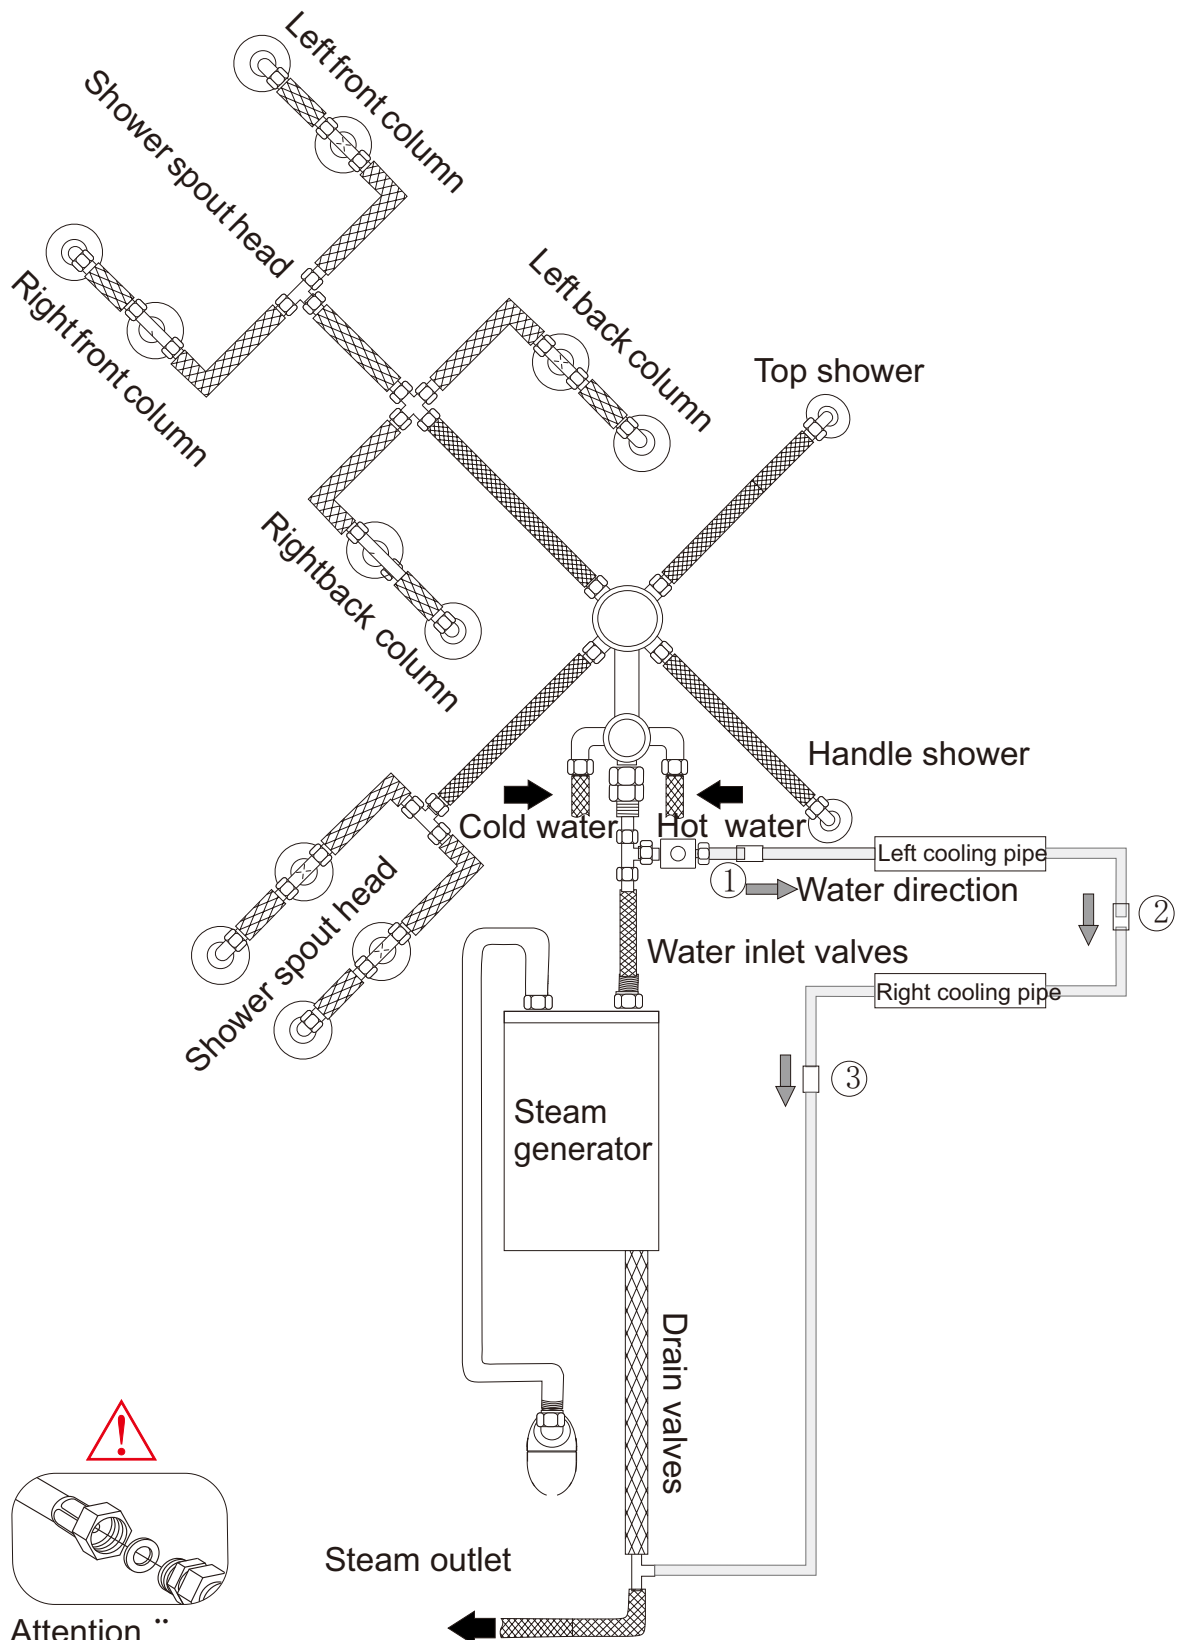

Fan: DC12V/5W

Color Light: DC12V/5W

Speaker: 8Ω/10W

Hot water: G1/2 galvanize zinc pipe, height 800mm;

Cold water : G1/2 galvanize zinc pipe, height :800mm;

Power: 230V/50Hz single phase three line system, above 16A load capability, 1200mm high from earth;

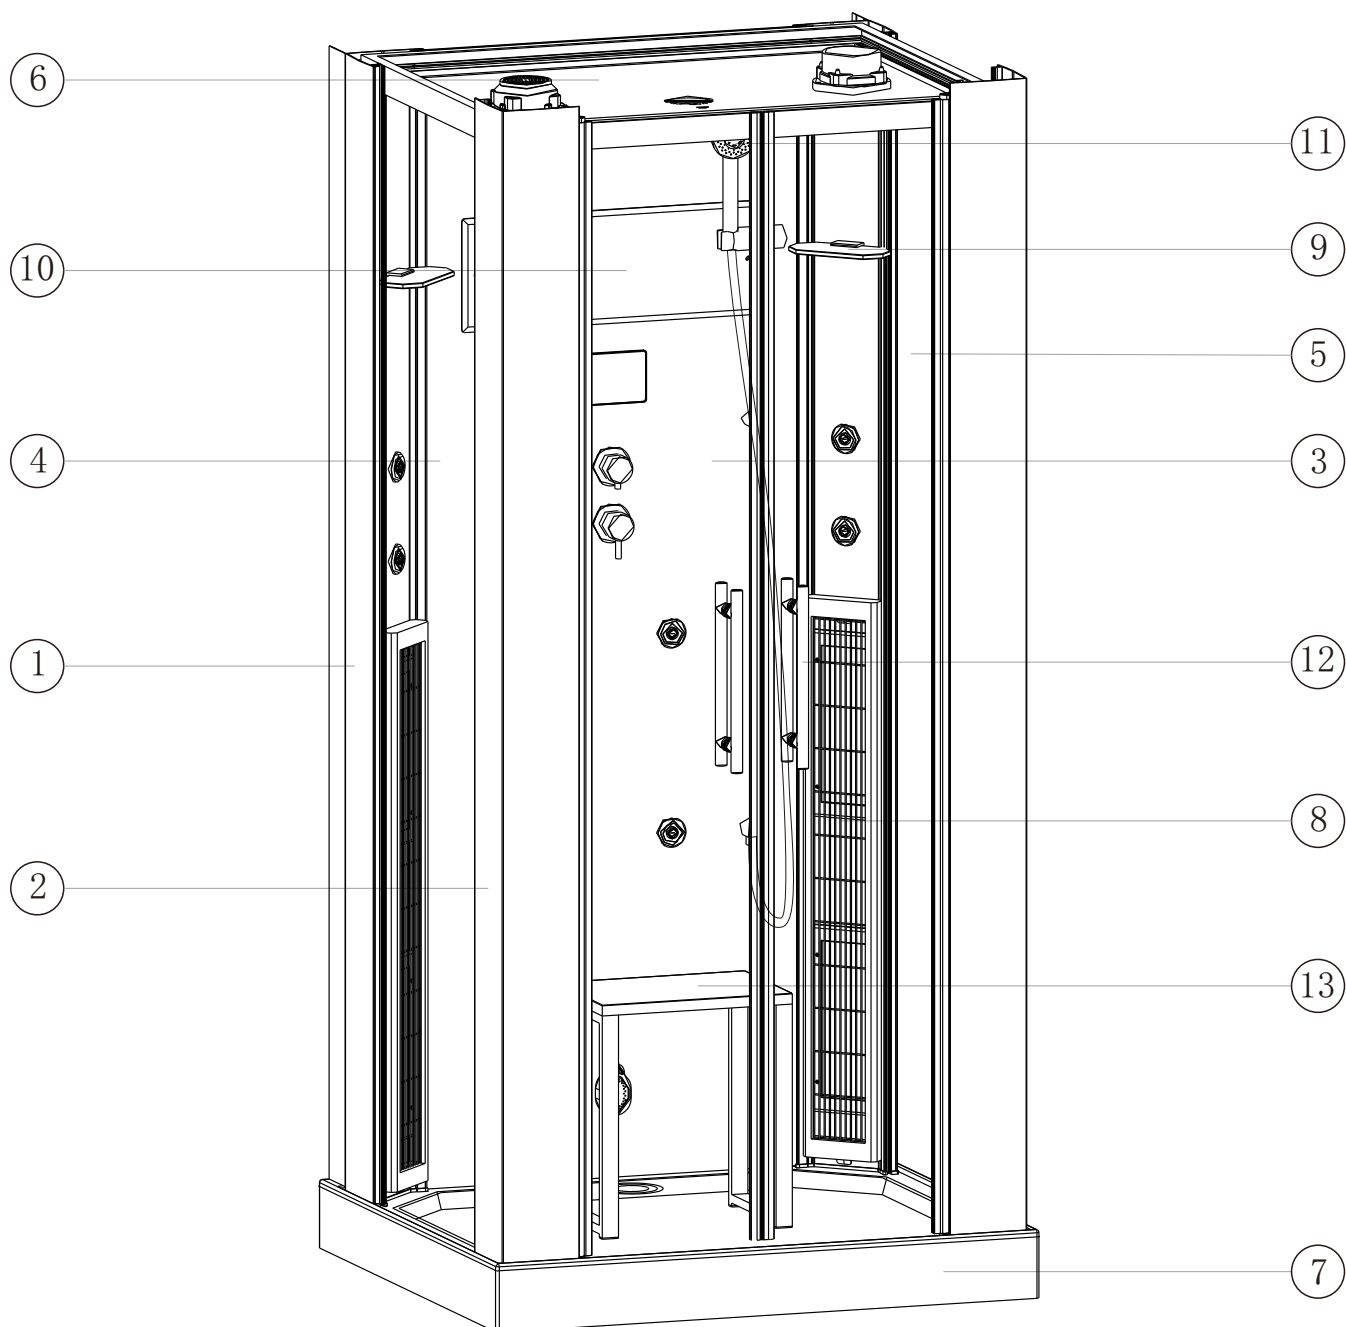

Sinkhole: The diameter of the sinkhole underground should be $\Phi 60$.

Attention:

1. When turn on the steam, please be sure that there`s enough cold water, otherwise, the steam generator will be damaged;
2. Power and water resource should be controled by divide switch, switch must be placed in the convenient place;
3. After enjoying your shower, the power and water resource must be turn off.
