## NET Backpack Qiu Xiaoxiao

[wsxxzd@sina.com](mailto:wsxxzd@sina.com)

Single-use shopping bags made from plastics and paper are a significant problem, polluting ecosystems everywhere. The Net Backpack removes the need for plastic and paper bags and can be used anytime, anywhere.

This backpack is made up of two parts: the inner bag is a backpack with removable straps that can be threaded through the openings of the outer bag, and then reattached to connect the two. The outside bag is a handbag. The Net Backpack can be used as one bag, or can be taken apart to be used separately whenever you need an extra bag.
