## Legenda

Le misure sono espresse in millimetri. La lettera "H" sta per altezza e "L" per larghezza, mentre le sezioni sono indicate con i simboli: ≠ Ø □ (piatto, tondo o diametro, quadro). Tra le dimensioni indicate e quelle reali vi possono essere delle lievi differenze, proprio perchè ogni elemento è prodotto in gran parte a mano.

(ca.) - Per le caratteristiche particolari del ferro forgiato, le misure degli articoli che seguono possono subire delle lievi variazioni dovute al tipo di lavorazioni cui sono sottoposti.

*All dimensions are expressed in millimeters. The letter "H" stands for height; "L" stands for length, while the shapes of the sections are indicated with the symbols: ≠ Ø □ (flat, round or diameter, square). There may be slight differences between the dimensions indicated and the real dimensions, precisely because each creation is produced in large part by the craftsman's hand.*

(ca.) - Because of their peculiarity, the measures of forged bars could be subjected to small variations due to their particular working process.

EURO-FER si riserva di apportare qualsiasi variazione ai dati indicati, al fine di migliorare il prodotto.  
EURO-FER retains the right to change the specification indicated in order to improve the product.

A richiesta è possibile realizzare produzioni personalizzate con motivi e misure non presenti in questo catalogo. 1) Avvitare i punti cardinali con un cacciavite. Fare attenzione che le lettere siano nella giusta posizione.

2) Collocare l'anemometro sull'asta.

3) Introdurre la parte superiore del segna vento sull'asta ed avvitarla fino in fondo con un cacciavite.

1) Screw the cardinal points through a screwdriver. Check that the letters are in the right position.

2) Place the anemometer on the rod.

3) Insert the upper part of the weather vanes in the rod and screw it in through a screwdriver.

Istruzioni:

1) Nel collocare il supporto di fissaggio regolabile o quello da parete, bisogna tener presente che la parte piana dove si fisserà il palo del segnavento deve essere perfettamente a livello.

2) Una volta fissato il supporto, avvitare il palo completamente montato tramite le 4 viti, senza però fissarne del tutto. Orientare quindi il segnavento servendosi della bussola (in tutte le bussole la freccia segna il nord magnetico). Con il braccio della lettera "N" rivolto verso nord, fissare con forza le viti.

Art. 16.285

Instructions:

1) Either if you are placing the adjustable fixing support, or the walls one, you will need to consider that the flat surface where you place the pole of the weather vanes needs to be completely level.

2) Once the support has been fixed, screw the mounted pole using the 4 screws, but leave them slightly unscrewed then, orient the weather vanes. Orient the weather vanes through the compass (all compasses have the arrow pointing at the magnetic north) and with the compass arm of letter "N" pointing at the north, finally screw the screws completely to the end.
