ARBUTUS ANALYZER: ADVANCED TRAINING

Learning objectives

The **Arbutus Analyzer advanced training** is a 3-day course aimed at making you a more efficient Arbutus Analyzer user by automating your analytics and integrating functions into your analysis. This course is designed to familiarize you with the creation and use of Analyzer procedures (automations) and functions in order to automate common tasks and to perform more complex analysis.

Key topics

- Harmonize data for better matching and results
- Use date and time data to identify weekend transactions and build flexible date ranges into your analysis
- Clarify the meaning of your data by inserting, including or excluding characters
- Identify duplicates in inconsistent data (fuzzy comparisons)
- Understand the nature of procedures (also known as scripts) in Analyzer and the various ways to create and edit them
- Create interactive procedures to prompt for information and use variables to store and update the information at run time
- Incorporate best practices, use conditional commands, and control the logical flow of your procedures

Methodology

This Arbutus Analyzer advanced training is an **online, yet live**, and **instructor-led** course based on the Arbutus-issued training materials. This course familiarises users with the creation and use of Arbutus Analyzer procedures (scripts) and functions in order to automate common tasks and to perform more complex analytics.

  Ideal for Europe & Africa

ARBUTUS ANALYZER

Whether it's helping to streamline the tax process for an entire country or turbocharging the evolution of an energy sector powerhouse's audit process, Arbutus is the engine that powers change.

Arbutus technology is leveraged heavily within areas such as Accounting, Audit, Compliance and Fraud Detection. Its speed, power and flexibility is what makes it relied upon by both the public and private sector in the pursuit of actionable results.

Open course training

Arbutus Software Inc. and its network of worldwide partners regularly organise this training as an **open course**. All our training sessions (both online and on-site) are conducted by Arbutus Certified Trainers.
