

ARBUTUS ANALYZER: INTERMEDIATE TRAINING

Learning objectives

The **Arbutus Analyzer intermediate training** is a 2-day course and is designed to show you how to apply **Arbutus Analyzer** functionality to data analytics projects. This will be accomplished through four case studies that cover data integrity verification, travel and entertainment expenses, vendor and inventory management and IT passive directory accounts and terminations.

Key topics

- Develop your skills in devising an efficient data analysis plan to achieve your goals
- Refresh your knowledge of and experience with basic Analyzer functionality
- Identify and apply the Analyzer functionality needed to achieve objectives
- Break analysis objectives into structured, manageable steps
- Familiarize you with common data analysis tasks and scenarios
- Identify and follow best practices
- Automate the solution for one case study

Methodology

This Arbutus Analyzer intermediate training is an **online, yet live**, and **instructor-led** course based on the Arbutus-issued training materials. The course incorporates hands-on realistic case studies which enhances the learning process by seeing how typical audit/data analysis tests are conducted in **Arbutus Analyzer**.
