Reducing harm
Rebuilding lives

Alcohol: the facts

Did you know?

- The recommended units per week for men or women is 14. For example: 6 pints of beer (4%) or 6 glasses of wine (175ml, 13%).
- Alcohol is a depressant.
- When mixed with cocaine it produces a toxic substance called cocoethylene which can be fatal.
- It takes approximately 1 hour for the body to process 1 unit of alcohol, depending on circumstances.
- Nothing but time will sober you up.
- Fizzy mixers speed up the affects of alcohol on the body.
- A standard glass of wine (175ml, 13%) contains approximately 160 calories.
- A pint of beer contains approximately 180 calories, roughly the same as a slice of pizza.

Alcohol and your health

- Alcohol is a causal factor in more than 60 medical conditions.
- Drinking at any stage of pregnancy can cause harm to the baby.
- Binge drinking can lead to short term injury such as falls, accidents and assaults.
- The long term effects of drinking are extensive and include: depression, anxiety, strokes, liver disease, cancer, brain/nerve damage. It can be fatal.
- Liver disease is the fifth biggest killer in England and Wales.
- Alcohol withdrawals can be fatal, so an agreed reduction plan must be adhered to.
- Regular drinking lowers the level of serotonin in the brain, which effects your mood.

Alcohol and the law

- The legal age to buy alcohol is 18.
- Being in charge of a vehicle while above the legal limit could result in three months imprisonment, a driving ban and a fine up to £2,500.
- Causing death by drink driving can result in 14 years in prison, an unlimited fine and a driving ban of at least two years.
- Refusing to provide a breath, blood or urine sample for analysis could lead to six months imprisonment, an unlimited fine and a driving ban for at least one year.
- It is against the law to drink alcohol in many public places including shopping centres.
