Character AI è una piattaforma per la creazione e la gestione di personaggi virtuali interattivi. Questi personaggi possono essere integrati in varie esperienze digitali, come siti web, app, chatbot e giochi.

Nel contesto alberghiero, Character AI può essere impiegato per sviluppare un bot di formazione del personale, e utilizzato per fornire supporto e istruzioni ai nuovi membri del team. Oppure si potrebbe creare un concierge virtuale che guida i nuovi clienti attraverso i processi di accoglienza.

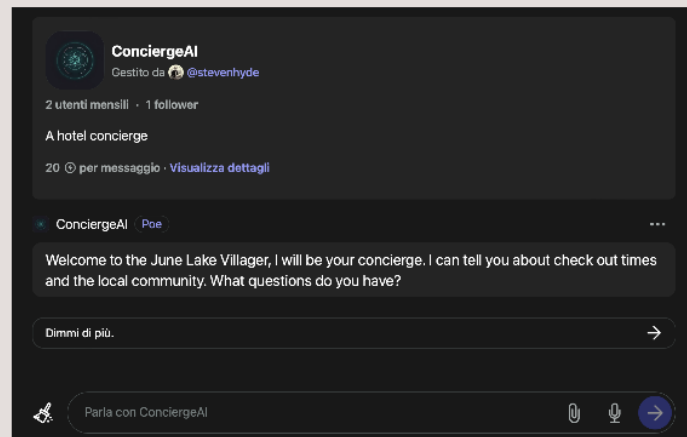

Poe

Visita il sito

Sulla stessa linea di Character.ai troviamo anche Poe. Attraverso Poe, è possibile porre domande, ottenere risposte immediate e intrattenere conversazioni con vari bot, tra cui ChatGPT, GPT-4, Claude 2 e altri.

Similmente a Character.AI, con Poe potremmo creare un bot del nostro albergo trasformando così Poe in un impiegato che può rispondere alle richieste dei clienti, fornire informazioni sulle strutture dell'hotel, suggerire attività locali o persino gestire prenotazioni.
