The scoring system:
You can choose to count goals or points. But in most cases don't count goals/points let them just play and have fun. For young children we recommend not to count the goals/points scored. The most important thing is to play and have fun and be part of the game. This also means without a scoreboard. It's here we get the new players ;D

Quote from a street-handball-international match: "We were counting goals up to around 3 and it seemed that the Instructor and later the players forgot to keep track of the score, but the match continued, and the kids enjoyed it and had fun. Finally, prizes were awarded by way of a draw." - See more rules on last page or www.streethandball.com
