

The Yellow List

The Yellow List put the students first as the centrist alternative in students' politics at UiB. We believe that everyone has the same human dignity and therefore we want every student to have equal opportunities at UiB.

We have 6 main areas to improve the day for each student:

Achieving the Sustainability Development Goals!

The University of Bergen has and should have a leading role in reaching the UN's Sustainability Development Goals. Yellow List wants UiB to use more research resources on environment and sustainability studies, as well as working towards becoming the leading university in the field of sustainability in Norway.

A better universal designed university!

Regardless the difficulties, every study program must be designed so that everyone can manage to conduct their course and have a fulfilling student experience at UiB. Whether the difficulties are of a physical, social or psychological kind, the University of Bergen should make every effort to make this possible.

A better Mentor Week for everyone!

Around fifty percent of all students at the University of Bergen think there is too much alcohol during the Mentor Week. That's why Yellow List wants to find alternatives that promote good social arenas where alcohol is not at the center. Examples: Tapas Night, board game competitions or other similar activities.

No student should be left lonely!

Studentene si helse og trivselundersøking viser at 1 av 3 studentar er einsame. Mange studentar har flytta heimafrå for første gang og trenger gode arenaer å møtast på. Gul Liste meiner derfor at ein må oppretta fleire lavterskel arrangement.

Make it easier to study for parents!

Every fourth student is a parent and UiB must therefore arrange for them to combine this in the best possible way with their studies. Mandatory attendance must take place in such a way that it does not prevent the student from caring for their child.

Electrical sockets in all auditoriums and reading rooms!

The University of Bergen demands all students to use a computer in their education. Yellow List therefore wants there to be adequate electrical sockets in rooms used for lectures and studying.
