MISSION BRIEFING

ECO EMERGENCY

Sneaky bosses in the plastic industry invented an "indifference ray". Whoever is hit by it believes that plastic is harmless to the environment. Now even in YOUR neighborhood, more and more people dump plastic waste in the environment instead of in the designated garbage cans! *Eco rescue heroes like YOU are needed!*

ECO RESCUE ACTION

Become a **PLASTIC PIRATE** and scavenge the plastic waste carelessly dumped into the environment of your neighborhood! Plastic bottles, bags, packaging, straws and even cigarette filters - almost everything is made of plastic and must be disposed of properly!

PLASTIC PIRATES

1. Grab your gear (see **EQUIPMENT**).

2. Choose a route, playground, beach, forest or similar.

3. For bigger loot, you can build a pirate crew with family & friends!

4. Gather as much stray plastic in the garbage bags as possible and put it in the designated trash can!

EXTRA: If you want to tell us about your plastic raid, then do the following before disposing of the plastic waste: **a)** weigh all the filled bin bags with the bathroom scales and calculate the total weight, **b)** take a photo of your triumph over the sneaky activities of the plastic villains.

EQUIPMENT

Garbage bags, protective gloves and/or a trash picker. Possibly a bathroom scale and a camera.

WARNING

Plastic waste can be sharp or dirty. To avoid injuries, always be careful and if in doubt, ask an adult.

SPECIAL TIP

Whenever you are outside, throw some stray plastic waste into a garbage can - for our planet every good deed counts!

REPORTING

Tell us about your eco-heroism. Not only will you become an honorary member of the Amazing Surfbots Eco Rescue Team (incl. printable certificate with your name on it). You will also have the chance to be featured in a detailed article on our website!
