

SWEDISH CLIMATE SYMPOSIUM 2022

Welcome to the Swedish Climate Symposium

Time & place: 16–18 May in Norrköping

Abstract submission (talk or poster): no later than 15 February

Registration: no later than 15 March

We are proud to welcome you to the first national scientific climate conference in Sweden – a unique opportunity for climate scientists to interact, reflect, and identify knowledge gaps and opportunities for the future.

The Swedish Climate Symposium will highlight the main conclusions of the 6th Assessment Report (AR6) of the IPCC and its consequences for Sweden. In a series of topical parallel sessions, a broad spectrum of expertise in climate sciences is presented, including modelling, experimental and field work, the role of paleoclimate science, observations, impact studies, mitigation strategies, interactions with biological diversity and ecosystem services, and the economic and governance aspects of climate change.

Media, politicians, and societal actors will be able to meet and interact with scientists during devoted sessions, with emphasis on the climate in a Swedish context.
