

Combined pressure and temperature transmitter with external temperature sensor

Combined pressure and temperature transmitter with external temperature sensor and for all pressure measuring ranges in the limits between vacuum and 600 bar.

Typical application areas

Railway	
Vehicle technology	
Trucks	
Construction machinery, special machines	✓
Forest -, agricultural machines	
Aerospace	
Medical technology	
Marine	
Environmental engineering	✓
Mechanical engineering and automation technology	✓
Process technology	✓
Motorsport	✓

Examples

Certificates and Tests

CE-Directive 2014/30/EU

The overview overleaf shows all adjustable parameters of this sensor.
The displayed values describe the standard limit values.

Each parameter can be adjusted according to actual customer needs.
The large number of parameter-specific options is compiled in detail
and with examples in the following document
and is available as a further download.

Do you need an individual solution?

Our strengths are the development and manufacture of the optimal solution for every customer-specific requirement. From the limitless variety of possibilities that sensor technology offers you, we will develop exactly the right one.

We produce your request 100% customized.

Give us a call or write to us ...we can do it!

Combined pressure and temperature transmitter with external temperature sensor

Basic specification

min. ... max. Values (guaranteed)

min. ... max. Values (guaranteed)

Pressure

Measuring range limits vacuum ... 600 bar (nominal pressure)

Over pressures (depending on upper measuring range limit) $\geq 1,2x$ nominal pressure

Burst pressures (depending on upper measuring range limit) $\geq 1,5x$ nominal pressure

Temperatur-Einsatzbereich

Operating temperature range

Medium -40 °C ... +125 °C

Ambient -40 °C ... +105 °C

compensated area -20 °C ... +85 °C

Mechanics

Shock resilience (DIN EN 60068-2-32) ... 1000 g [g: 9,81m/s²]

Vibration resilience (DIN EN 60068-2-6) ... 20 g [g: 9,81m/s²]

Shock load capacity (DIN EN 60068-2-27) ... 50 g [g: 9,81m/s²]

Material in media contact Stainless steel

Housing material Stainless steel

Process connections according to customer requirements

Electrical connections according to customer requirements

Electrical output assignment according to customer requirements

Weight ≥ 120 g

Protection classes (DIN EN 60529) ... IP69K

Status 14.12.2020

*1: including non-linearity, hysteresis, repeatability, zero point- and final value deviation (according to IEC 61298-2)

*2: Best Fit Straight Line

Electronics and electrical parameters

Output

@Pressure measurement 2-wire Current loop, voltage (non-/ratiometric), digital

@Temperature measurement 2-wire Current loop, voltage (non-/ratiometric), digital; PT100, PT1000

@Force measurement

Response time 10-90% (typical)

@Pressure measurement 1 ms ... 2 ms

@Temperature measurement 2 s ... 60 s

Input

Supply Depending on the o

Load resistance Depending on the output signal

Power consumption (typical) Depending on the o

Dielectric strength 30 VDC

Accuracy

Total error*1 @RT (typical) $\pm 0,50$ % FS

Nichtlinearität (BFSL*2) $\pm 0,15$ % FS
Non-linearity (BFSL*2)

Stability / year $\pm 0,15$ % FS

Compensated area

mean temperature coefficient offset ... $\pm 0,15$ %/10K

mean temperature coefficient range ... $\pm 0,15$ %/10K

Außerhalb kompensierter Bereich Outside of the compensated area

Total error*1 @lower limit temperature ... $\pm 2,00$ %

Total error*1 @upper limit temperature ... $\pm 2,00$ %
