1. About This Document

1.1 Function

This instruction provides the information required for mounting, connection, setup, maintenance, and resolving faults. Please read this information before installing the sensor and putting the instrument into operation and keep this manual accessible. All performance characteristics within this document are at a set of standard conditions, and user experience may differ depending on varying application conditions.

1.2 Document Online Location

https://www.gemssensors.com/uls-200-datasheet

1.3 Symbols Used

INFORMATION, NOTE, TIP:

This symbol indicates helpful additional information and tips for successful work.

This symbol indicates notes to prevent failures, malfunctions, damage to devices or plants.

Non-observance of the information marked with this symbol may result in personal injury.

Non-observance of the information marked with this symbol may result in serious or fatal personal injury.

Non-observance of the information marked with this symbol results in serious or fatal personal injury.

EX APPLICATIONS:

This symbol indicates special instructions for Ex applications.

BATTERY DISPOSAL:

This symbol indicates special information about the disposal of batteries and accumulators.

2. Safety

2.1 Personal Protective Equipment (PPE)

Personal protective equipment should always be worn when working with the sensor.

2.2 Appropriate Use

Note the following:

WARNING: GEMS PRODUCTS MAY ONLY BE USED FOR THE APPLICATIONS DESCRIBED IN THIS DOCUMENT. IF PRODUCTS AND COMPONENTS FROM OTHER MANUFACTURERS ARE USED, THESE MUST BE RECOMMENDED OR APPROVED BY GEMS. PROPER TRANSPORT, STORAGE, INSTALLATION, ASSEMBLY, COMMISSIONING, OPERATION AND MAINTENANCE ARE REQUIRED TO ENSURE THAT THE PRODUCTS OPERATE SAFELY AND WITHOUT ANY PROBLEMS. THE PERMISSIBLE AMBIENT CONDITIONS MUST BE COMPLIED WITH. THE INFORMATION IN THE RELEVANT DOCUMENTATION MUST BE OBSERVED.

2.3 Incorrect Use

Incorrect or inappropriate use of this sensor can increase the likelihood of application hazards not limited to vessel overfill, damage to property, environmental contamination, and damage to the sensor itself.

3. Product Description

The Gems' ULS-200 Solid-State Point-Level Sensor works with a wide variety of media. It eliminates failure caused by moving parts and works well in high-viscous, high-pressure, humid, and reflective applications. It does not rely on specific gravity or conductivity.

2024-08-30 PAGE 3

- · Compact design
- · Accurate and repeatable electronic point level switching
- Durable all 316L stainless steel or brass housing with IP6k9k rating
- · Wide media range

Applications

- Construction
- Water & Wastewater
- Emergency Vehicles
- · Power Generation
- Renewable Energy
- Buses & Recreational
- HVAC
- Semiconductor
- Agriculture
- Oil & Water TCUs
- Medical & Laboratory
- General Industrial

3.1 Specifications

MED)IA	Aqueous, Oil & Hydrocarbon-Based Liquids, Dielectric > 2.2		
MOUN	TING	1/4"-18 NPT, 1/2"-14 NPT, G1/4"-19 B, M12x1.5-6g		
	HOUSING	Brass, 316L Stainless Steel		
WETTED MATERIALS	O-RING	Buna-N		
	PROBE TIP	PVDF (Aqueous) or PBT (Hydrocarbon)		
OPERATING	PRESSURE	Up to 300 PSIG (20.7 bar)		
OPERATING TE	MPERATURE	-40° F to +257° F (-40° C to +125° C)		
SUPPLY V	OLTAGE	9-32 VDC		
CURRENT COM	SUMPTION	6mA Max. (No Load)		
OUTF	TUT	Solid-State, Sinking or Sourcing Output, 9-32 VDC, 300mA Max.		
ELECTRICAL TE	ERMINATION	3-pin Deutsch DT04-3P		
TIME DELAY INGRESS PROTECTION APPROVALS		No Delay, 3 Sec, 5 Sec, 10 Sec		
		IPX7 & IP6K9K		
		CE, RoHS		

Reference Operating Conditions: Ambient Temperature: 20° C (68° F) $\pm 5^{\circ}$ C; Media Temperature: 20° C (68° F) $\pm 5^{\circ}$ C; Process Pressure: 1 Bar (14.5 PSI); Media Type: Water; Humidity: <60% RH Non-condensing

3.2 Part Number Nomenclature

ULS200	X	X	X	х	X	XX	XX
SERIES	HOUSING MATERIAL	ACTUATION CONDITION	THREAD SIZE	INTEGRAL CONNECTOR	MEDIA BASED SENSING TYPE	TIME DELAY (INCREASING LEVEL)	TIME DELAY (DECREASING LEVEL)
	S - 316 S.S.	A - Wet Sink†	1 - 1/4" NPT [†]	Y - Deutsch DT04-3P [†]	W - Water ^{†*}	00 -No Delay†	00 -No Delay†
	B - Brass [†]	B - Dry Sink	2 - 1/2" NPT		H - Hydrocarbon	03 - 3 sec.	03 - 3 sec.
		C - Wet Source	3 - M12x1.5			05 - 5 sec.	05 - 5 sec.
		D - Dry Source	4 - G1/4-19			10 - 10 sec.	10 - 10 sec.

[†]Standard Configuration

PAGE 4 2024-08-30

^{*}Please consult the factory for application review assistance for media with dielectric constants < 40.

3.3 Sensor Labels

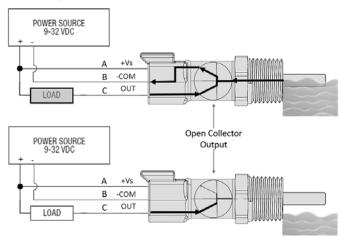

Product Label

Package Label

3.4 Operating Principle

The ULS-200 uses a solid-state switching output. It can be configured from our factory to switch to a positive "true" signal in either wet or dry condition. It can also be configured with a built in delay on rising, falling, or both. Diagram example is shown below (signal "true" when wet).

Wet Sinking

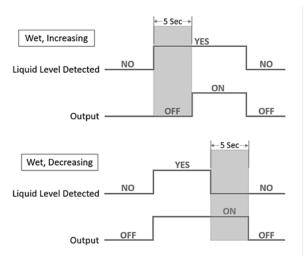

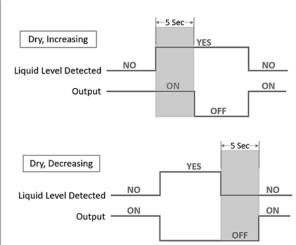

3.5 Sensor Technology

The ULS-200 uses capacitive sensing technology to detect the presence or absence of high (water-based) or low (oil-based) dielectric liquid media.

More on Capacitive sensing can be found here: https://www.gemssensors.com/resource-center/operating-principles-installation-and-maintenance/level/capacitive-level-switch-operating-principle

3.6 Time Delays

2024-08-30 PAGE 5

4. Installation

4.1 Torque Specifications

1/4" NPT	1 to 2 Turns Right Hand-Tight	
1/2" NPT	1 to 2 Turns Right Hand-Tight	
M12x1.5	14.5 - 16.5 ft/lb	
G1/2-19	25 - 27.5 ft/lb	

4.2 Orientation

Sensor may be mounted in any position. Optimal performance is with sensor in horizontal position. The entire length of the sensing probe should be kept at least 0.50" (12.7 mm) away from any surface on all sides. Please pay special attention when using adapters that may cause the liquid media to remain inside the cavity. Bench testing the product in these applications is recommended. Oil-based liquids with higher viscosities are especially susceptible.

5. Electrical Connection

5.1 Safely Connect

All electrical connections should be carried out by qualified personnel.

WARNING: GEMS PRODUCTS MUST BE MAINTAINED AND INSTALLED IN STRICT ACCORDANCE WITH THE NATIONAL ELECTRICAL CODE AND THE APPLICABLE GEMS PRODUCT DATASHEET THAT COVERS INSTALLATION, OPERATION, AND PROPER MAINTENANCE. FAILURE TO OBSERVE THIS INFORMATION MAY RESULT IN SERIOUS INJURY OR DAMAGES. ELECTRICAL CONNECTIONS SHOULD ONLY BE CARRIED OUT BY TRAINED, AUTHORIZED PERSONNEL. IF OVERVOLTAGE SURGES ARE POSSIBLE, PROPER SURGE PROTECTION SHOULD BE INSTALLED.

5.2 Water Ingress Protection

WARNING: ALTHOUGH THE ULS-200 COMES WITH IP6K9K RATING, THAT DOES NOT INCLUDE THE ELECTRICAL MATING CONNECTION. TO INSURE BETTER PROTECTION FROM MOISTURE INGRESS, PLEASE CONSIDER THE FOLLOWING MEASURES:

- FIRMLY INSERT THE MATING CABLE UNTIL FULLY SEATED
- PATH THE CONNECTION CABLE OR WIRES DOWNWARDS

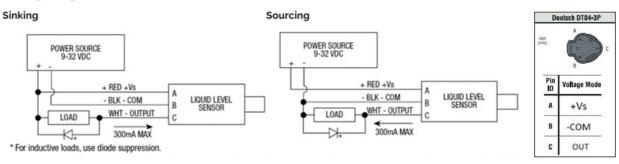

5.3 Voltage Supply

SUPPLY VOLTAGE	9-32 VDC	
CURRENT CONSUMPTION	6mA Max. (No Load)	

5.4 Wiring

OUTPUT Solid-State, Sinking or Sourcing Output, 9-32 VDC, 300mA Max.

Wiring Diagram

6. Maintenance

6.1 Basic Maintenance

Only use cleaning agents that are compatible with the sensor's materials. Use proper care when cleaning, and only use methods that do not exceed the housing protection rating.

- Electrical entries and mounting points in an enclosed tank may require liquid/vapor sealing.
- Our sensors must not be field-repaired.
- Physical damage sustained by product may render it unserviceable.

6.2 Basic Troubleshooting

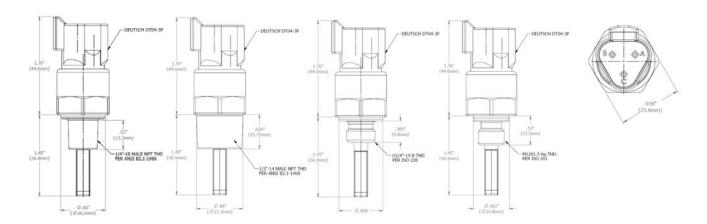

Is the power supply correct?	Standard sensors require a 9 to 32 VDC input. Use a known good power supply as well as a known good voltmeter and see if the sensor responds to media.
Is the wiring correct?	Wiring schematics can be found in section 5.4 of this document.
Did you inspect the sensing element?	 Make sure the sensing probe is clean without dried-on debris that could cause a false reading, and the probe should be kept at least 0.50" (12.7 mm) away from any surface.
Have you tested the sensor?	Remove the sensor completely from your mechanical and electrical system. This will isolate any variable in the circuitry. Test with room temp tap water or engine oil. This way, it is a good known target fluid
Have you reviewed the mounting and switch point location?	The sensor should not be mounted in a port or tube where media can get trapped. It should not be mounted at the top vertically or at a severe angle. Best mounting practice is horizontal direct into tank wall.
Is the dielectric constant outside of the sensor's range?	 Please confirm the dielectric constant of the media. For dielectric constants < 40, please consult the factory for application review assistance.

6.3 Returns

Standard terms & conditions of sale apply. Refer to the document located online at https://www.gemssensors.com/docs/default-source/resource-files/terms-conditions/gems-customer-terms. All RA activity must go through the Gems quality services team. To initiate an RA please go to https://ecatalog.gemssensors.com/support/ra

7. Mechanical Construction

8. Certificates & Approvals

8.1 Certificates, Approvals & Ratings

IPX7 & IP6K9K per ISO 20653

Application of EU Directive(s):

- 2014/30/EU Electromagnetic Compatibility
- 2011/65/EU Restriction of Hazardous Substances in Electrical and Electronic Equipment and subsequent amendment 2015/863/EU

Harmonized Standard(s) to which Conformity is declared:

- EN IEC 61326-1:2021
- EN IEC 61326-2-3:2021
- EN IEC 63000:2018
