

## Creating a New Future Together Stig Wahlström Automatik AB Merges with Swelex AB

Swelex AB and Stig Wahlström Automatik AB have jointly decided to initiate closer cooperation and integration. The aim is to create a stronger and more sustainable platform for future growth where both companies' expertise, experiences, and offerings can be combined for the benefit of customers and suppliers.

Swelex AB is a technology distribution company focused on customized solutions in areas such as connectors, cabling, thermal management, EMC/RFI/RF, and light guides. Swelex operates in sectors including defense, industry, telecommunications, and energy, with a clear strategy for growth and development through organic expansion and in-house production.

Stig Wahlström Automatik AB is an experienced supplier of automation and safety solutions to Sweden's manufacturing industry. The company offers components and custom subsystems in areas such as pressure, flow, level, temperature, and air and vacuum technology. With in-house production, warehousing, and development in Gävle, the company is a reliable partner for tailored solutions from concept to finished product.

As of today, Tommy Ahlsved takes over as CEO of Stig Wahlström Automatik AB. Tommy is already the CEO of Swelex AB. The integration between the companies will take place gradually, with great consideration for both companies' customer, suppliers, and employees.

**In the short term, this means no other changes than the CEO role being taken over by Tommy Ahlsved. All existing contact persons for customers and suppliers in both companies remain, and operations will continue as before until further decisions are made in the next step of the merger.**

What does this mean for you as a customer?  
By joining forces with Swelex, we can now offer you:

- The same contact persons as before, but with even stronger support behind them
- Access to an even broader range of specialist expertise
- An expanded selection of technical solutions
- No changes to address or deliveries

"We see this as a natural and long-term step that strengthens both the offering and the structure of the business. Two profitable and well-positioned companies are now combining their strengths – enabling broader customer value and new growth paths. I look forward to continuing to develop our offering with a focus on long-term customer benefits together with the employees in both companies," says Tommy Ahlsved, CEO of both Swelex AB and Stig Wahlström Automatik AB.

"This is a well-considered and strategic decision that we fully support. We want to extend a warm thank you to former CEO Anders Olsson for his contributions to the company, and at the same time warmly welcome Tommy as the new leader for the journey ahead," says Ann-Charlotte Andersson, Business Unit Manager within Addtech, business area Electrification.
