We are TAKEOFF!

2019 was the first time students at the flight section were able to attend their first ever career fair, at our own student local. This year we move to Nymble and welcomes 8 highly interesting companies! We hope that you will have great conversations with them, and perhaps get a first contact with your future employer.

Enjoy your time at TAKEOFF!

AFRY is an international engineering, design, and advisory company. We support our clients to progress in sustainability and digitalization. We are 17,000 devoted experts within the fields of infrastructure, industry and energy, operating across the world to create sustainable solutions for future generations.

The aviation industry is constantly undergoing change, particularly in light of the recent pandemic. This is driven by a mixture of internal and global factors, requiring our customers to quickly react and adapt to new technologies and new ways of working without compromising safety and compliance. We support our customers in doing so!

AFRY Aviation are focused on delivering products and services to the aviation industry and work with many of the major airlines in Europe like Scandinavian Airlines, Norwegian, Widerøe, Finnair, Flybe, and Iceland Air. We also work with the Swedish, Royal Thai, Hungarian, Czech and Norwegian Airforce with everything from JAS39 Gripen, Helicopter systems to Unmanned Aerial Vehicles.

The section is active in the aviation and maintenance industry and works with both private and public clients. With world leading expertise within business processes and maintenance systems we support our clients with Project management, Rules & Regulations, software utilization, software implementation, digitize maintenance processes, quality assurance, product and systems development.

What We offer

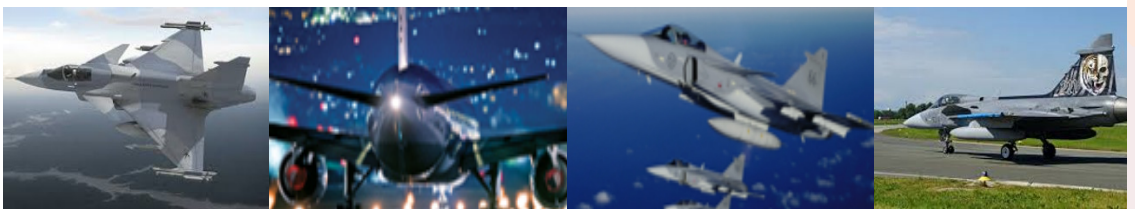

As an employer, we offer career opportunities in a modern workplace with challenging assignments and exciting projects all over the world with the possibility to work with both civil and defence aviation customers. We strive to have an inclusive culture with leaders who dare to think big and out of the box. Leaders who are brave, devoted, and stand up for what they believe in, and who support you in doing the same.

- AFRY Future Stars Program, As a Future Star, you get the opportunity to start your journey with us during your time as a student. We will provide you with experiences, knowledge, and a network that prepares you for your future career.
- Master Thesis Assignments
- Full-time Employments

AAC Clyde Space, a leading New Space company, specialises in small satellite technologies and services that enable businesses, governments, and educational organisations to access high-quality, timely data from space. This data has a vast range of applications, from weather forecasting to precision farming to environmental monitoring, and is essential to improving our quality of life on Earth.

Our growing capabilities bring together three divisions:

Space Data as a Service – delivering data from space directly to customers

Space missions – turnkey solutions that empower customers to streamline their space missions

Space products and components – a full range of off-the-shelf and tailor-made subsystems, components and sensors

AAC Clyde Space have been operating for over 15 years and aim to become a world leader in commercial small satellites and services from space. Satellites are one of the most vital tools to better understand our planet and by applying advances in technology to tackle global challenges we are bringing space down to earth, from the ability to monitor extreme weather events in real-time to looking for trends in changes to key climate change indicators such as the health of the ocean to monitoring size of the polar ice caps.

Some of our clients include Horizon Technologies, Orbcomm, NSLComm, OHB Sweden, Intuitive Machines, Orbital Micro Systems, the United States Airforce Academy, UK Space Agency, European Space Agency and NASA.

AAC Clyde Space's main operations are located in the United Kingdom, Sweden, the Netherlands and the USA, with partner networks in Japan and South Korea. The Group's has increased its international workforce by +27% in 2020, with now over 150 employees.

What we offer

We can offer post graduate employment in both Delft and Sweden for permanent employment

Summer placements, Masters thesis or project work will also be considered on a case-by-case basis in both Sweden & Delft.

In 2022 we are looking to implement a structured & paid internship programme.

DELTA AKUSTIK

Delta Akustik started with the goal to be amongst the top acoustic consulting firms in Sweden. Our business idea is to be very responsive and meet our clients needs with short lead time and high efficiency. Today, we consist of eight people with an office in Telefonplan and work with a wide variety of different exciting missions, amongst these are music studios, arenas and cultural venues.

Our ambition is to be a tightly connected team, of maximum twelve people, who constantly develops and drives the development forward. With this said, we promote creativity and innovation. As Acoustic consultants we work with projecting, design and calculation of acoustics in buildings. Furthermore, we work with room acoustics, environmental noise in cities and we also perform measurements of sound and vibrations.

What we offer

Offers both summer jobs and thesis jobs on both bachelor and masters level.

Keywords

Acoustics, creativity, community, drive, responsiveness and having fun!

FÖRSVARETS MATERIELVERK

FMV

The defence sector is growing rapidly. At FMV, engineers, lawyers, economists, buyers, project managers and many others work with cutting edge technology in complex projects and procurements which puts high demand on technical and businesslike competence. As an employee at FMV, the width of our mission gives you the opportunity to work with exciting content, different types of arrangements and activities.

FMV, Försvarets materielverk (The Swedish Defence Materiel Administration), is an authority within the field of defence. We have a mission, which is about making sure Swedish soldiers, pilots and boatmen have the right equipment to be able to practice and, in serious situations, be able to defend Sweden.

Our goal is to deliver the right materials, in time and to a cost that uses the tax money as effectively as possible. We procure, develop and deliver technology, services and material to the Swedish Armed Forces. Everything from helicopters, submarines, GRIPEN-fighters and laced boots to horse blankets, radar stations, armored terrain vehicles and pillows.

FMV runs about 600 material missions simultaneously on behalf of mainly The Swedish Armed Forces. Every year, around 100 missions are completed while also starting just as many new ones.

We create benefits and usefulness

- We base our priorities from what is useful for the client
- Are conscious about costs
- Delivers in time, to the right price and quality

We make it possible

- Knows and understands our clients and their business and their needs
- Acts to contribute throughout and working together
- Are proactive and takes initiative

We build trust

- Our attitudes and work way bear the stamp of mutual trust
- Delivers defence logistic when and where it is needed
- Are a competent and effective authority

What we offer:

FMV offers summer jobs, thesis opportunities and workspace practice for students. Read more about available jobs, what we offer and how you proceed in doing, for example workspace practice at: www.fmv.se

sopra steria

Sopra Steria is a leading international consulting company in digital transformation with one of the market's most comprehensive service portfolios.
