

REVO LUTIONEN TEKSTIL RT

STUDENT HELPER WITH LCA SKILLS

LCA, Consulting and research in the textile industry

Do you want to help us guide companies to minimizing their environmental impact? Then you might be who we are looking for.

We are looking for someone who can help doing life cycle assessments, be part of projects on guiding companies to reduce their impact and dive into new topics. What we are looking for is a person that manages to balance technical knowledge with the ability to understand the needs of a customer.

You should love to dive deep into complex subjects and find practical solutions to difficult and sometimes highly technical problems - even where the ideal data might not be available. At the same time, you should be able to put yourself in the position of customers and understand what they need.

Although the position contains many functions and a variety of different tasks, the job will be centered around assisting in measuring impacts and guiding companies to set better goals and make better choices.

The job include the following tasks:

- Assisting in (and eventually leading) LCA processes
 - Research and data collection
 - Modelling
 - Report writing
- Presentation of findings
 - Assisting in consulting projects
 - Clarification of goals
 - Research and writing
 - Creation of easy-to-read slides
- Research on topics related to sustainability in the textile industry
- EU legislation and initiatives
 - Industry initiatives
 - Academic literature
- Ad hoc assistance on other projects

We imagine that you

- are a master's student in something related to measuring environmental impacts.
- have had at least one course on LCAs and have worked with SimaPro (or similar)
- want to work with sustainability in the textile industry.
- can read Danish
- speak and write English
- like the startup atmosphere where there are not yet protocols for everything.
- are not afraid of challenging how things are being done.
- are not afraid of talking to people you don't know.
- like diving deep into technical stuff.
- are tech savvy and good at finding solutions for software problems.
- manage MS office and Google Drive with ease
- are good at learning and can understand complex topics fast.

Plus points

- Adobe Illustrator skills
- Knowledge on the textile industry
- A good eye for visual aesthetics

About Tekstilrevolutionen

We are an independent thinktank focusing on being a catalyst for a textile industry with a positive impact on the planet and those who inhabit it. We gather knowledge, create new ideas and generate data to inform, support and push the most ambitious politicians, brands, individuals and actors in the textile industry. Our approach to sustainability is holistic. We acknowledge that strict focus on a single aspect of sustainability runs the risk of worsening other aspects. We don't want to solve a problem just to create a new, equally large one somewhere else.

Measuring impacts and guiding companies is a big part of what we do and we believe that not one single actor alone can solve the immense problems that we are facing in the industry. That is why we also work to influence and change legislation and enlighten consumers to be more conscious. We are very much still a start-up. That means we don't have people that do one thing only. We are all helping with everything. We have strong bonds within the team, and we make an effort to do cozy things together. We believe that knowing each other on a social level helps how we perform as a team.

We are experimenting with workflows and are among other things using Timeblocks to structure our workday more efficiently and we use 4DX to structure our goals.

What we offer

- A young, informal, caring, and challenging working environment where we are having fun.
- Opportunities for developing your skills in measuring sustainability.
- Being part of a team passionate about changing the status quo and creating a healthier planet.
- Sparring with competent colleagues when you apply learnings from university into practice.
- Flexibility when it comes to exams etc. in your studies.
- Healthy lunch. - waffles and ice cream occasionally.

Working conditions

10-15 hours per week in our office in Nørrebro, Copenhagen. Salary: 140 kr. per hour

Application
