The Hit Log

The Hit Log lists, in order of first entry date and then entry position, every record to appear in the chart since it began. This list shows all entries that charted during the year 1940, meaning entries that first charted in prior years are also shown. The information is sorted by number in the sequence of charting records. Entry position is the entry position when first charting, while both Peak Position and weeks on chart refer to the records entire chart run, sometimes across multiple years.

Title Listing For 1940

This is an alphabetical listing of titles, sorted by their first letters. Any title starting with "A" or "The" is listed under the second word. The peak and the day/month of first chart entry of the title is shown. Where the same title charted in the same year, the entries are sorted by the highest position reached by that track. In the unlikely event of two or more records reaching the same position, they are listed alphabetically by artist, although the artist is not sorted alphabetically.

The Hit Log

The Hit Log lists, in order of first entry date and then entry position, every record to appear in the chart since it began. This list shows all entries that charted during the year 1940, meaning entries that first charted in prior years are also shown. The information is sorted by number in the sequence of charting records. Entry position is the entry position when first charting, while both Peak Position and weeks on chart refer to the records entire chart run, sometimes across multiple years.

Top 500 Most Weeks On Chart Artists - New Entries Only

The listing here is the Top 500 Artists based on weeks in the chart (defined as the full charts as listed in the database), sorted by total weeks, then by most recent exit date, with a more recent exit ranked higher than an older one, and finally alphabetically by artist. New entries to the listing, from artists not on the chart prior to 1963 are the only artists shown here, and the listing shows all that are new and where they rank in this year.

Average Chart Age - Bottom 130 Chart Weeks

To calculate this statistic, each week has the week count added up and then this is divided by the number of positions on that weeks chart. The result is the average age of the chart. A low number means that the chart is full of new entries; a high number means the chart is full of older hits, or records that have been around for a while. This showcases the bottom 130 weeks from the start of the charts existence to the current year, 1978, arranged from lowest average downwards. Those dates in the current year are highlighted.

The Top 500 Most Weeks On Chart Artists

The listing here is the Top 500 Artists based on weeks in the chart (defined as the full charts as listed in the database), sorted by total weeks, then by most recent exit date, with a more recent exit ranked higher than an older one, and finally alphabetically by artist. Rank in the previous year, 1977, is shown as is the additional weeks currently charting artists have added over last year, and any change in peak position.
