

Strawberry rack

Will hold 5 containers with 5 strawberry plants in each of them.

Cut sheet

Use impregnated wood or hardwood. If needed, wood can be cut to size at your local hardware store, but a mitre saw or hand saw will work fine as well.

Construction

Use waterproof wood glue and stainless steel screws to attach all the pieces together. Pre-drill the holes for the screws so that the plywood doesn't split. Assemble the pieces for the mold and the lid in the following order.
