

Knife Filing Jig Base Plate

Cut sheet 3/4" plywood:

If needed, wood can be cut to size at your local hardware store, but a jigsaw or circular saw will work fine as well, as long as you cut as straight as you can.

Construction

Use wood glue and screws to attach all the wooden pieces together. Use clamps to clamp overnight so everything glues together nicely. Pre-drill the holes for the screws so that the plywood doesn't split. Assemble the pieces for base of the knife filing jig in the following order.

Assembly:
