

# Global Supply Chain - Intern

As our market is in growth, we are looking for a Supply Chain/purchasing intern to assist our Purchasing team. You will work with young, international colleagues from different countries.

During the internship you will get the opportunity to gain huge insight in the full value chain: from the very first product-idea, development, production, and transportation of goods.

## We prefer if you:

- Are interested in working with supply chain, purchase, and the production process of fashion garments
- Are interested in working with foreign countries
- Are good with numbers and calculations
- Speak and write English, and preferable also one of the following languages: German, Dutch, Spanish, Polish, or Danish
- Think and work independently

## Your daily work tasks:

- Ensuring the right production and delivery of the garments, oversee the whole process and constantly checking everything is done the right way
- Get in touch with customers: Understand their needs and wishes
- Get in touch with both our colleagues and factories in the Far East
- Help, where needed

Our company is placed in Southern Denmark, Kolding. Here you will come to work in an international company with young and dedicated colleagues. We have good working conditions and an informal environment, where you will be introduced to the task during the first weeks.

## The benefits from the internship will be several:

- Knowledge of the whole supply chain
- Insight in the whole production process
- Compare theory and practice (a good basis for your thesis)
- Close cooperation between design, sales and buying department
- Working in an international company with 6-8 different country cultures
- Cooperation with colleagues in the Far East
- Training in English, both written and spoken, every day
- Work in “real life” – including sharp deadlines

The internship is fulltime, and it will last for 5-6 months and starts by agreement.

Is that you? If yes, please upload your CV and application – **in English please** - via this link: [LINK](#)
