TriTiCon releases TTC TRIALHUB ; an online site portal for sharing information & interacting with clinical trial sites

Agile trial execution and, complex and adaptive trials, call for better ways to support sponsors´ interactions and collaborations with their clinical trial sites. The TTC TRIALHUB helps sponsors to streamline, consolidate and control the distribution of information and documents to sites.

Monday, 22 June, 2020 – TTC Solutions AB and TriTiCons´ digital platform, TTC TRIALHUB , is being released. The TTC TRIALHUB is an information portal consolidating and presenting clinical trial information and documents to trial sites, essentially allowing for information interchange and collaboration between sponsors and clinical trial sites. Different types of trial information and material from different providers, for example the clinical trial protocol, manuals, forms, newsletters, links to systems and contact information, is made available in a single location and is structured in an easy and intuitive way. The TTC TRIALHUB allows the sponsor to control document rollout by site, country or region and ensures compliance in document distribution.

TTC TRIALHUB - Features

- Protocol overview – Overview of trial visits and procedures with instructions and links to associated documents
- Document library – Versioned material library for the protocol, forms, templates, etc.
- Contact information – Centralized, easily maintained contact information for CRAs, the sponsor, helpdesks, SAE reporting, unblinding etc.
- Links to systems and other resources.
- News and messages from the sponsor – News, key alerts, areas of interest.

❝ *"We are very delighted to include* TTC TRIALHUB *in our range of offerings to the eClinical landscape. With increasing complex trials plus the need for frequent updates, along side the current COVID-19 challenges, the need for an efficient and controlled distribution of information is more evident than ever before. With* TTC TRIALHUB *we are offering a digital site portal that is easy to get up and running, has short set-up timelines and a clear and transparent pricing model."*

--- Anders Mortin, Co-Founder, TriTicon ApS
