PRO Wear by ID® **MADE TO LAST**

WELCOME TO ID[®] IDENTITY

Every day, we provide clothing for companies and events across Europe, emphasizing the joint corporate identity of our customers' customers. Rooted in Denmark, but with an international outlook, we want to deliver best-in-industry clothing in terms of quality, functionality, design and responsibility.

USE | CARE | UNITE

We believe that good quality and unquestionable product performance is of highest importance to our customers. We strive to be the quality choice and develop high quality products.

Embracing the ID® history and meeting the future, we keep on striving for excellent product performance. We describe our DNA in three small words **USE | CARE | UNITE.**

USE

The ID® garments are designed with the greatest consideration for performance and durability when in **USE**.

CARE

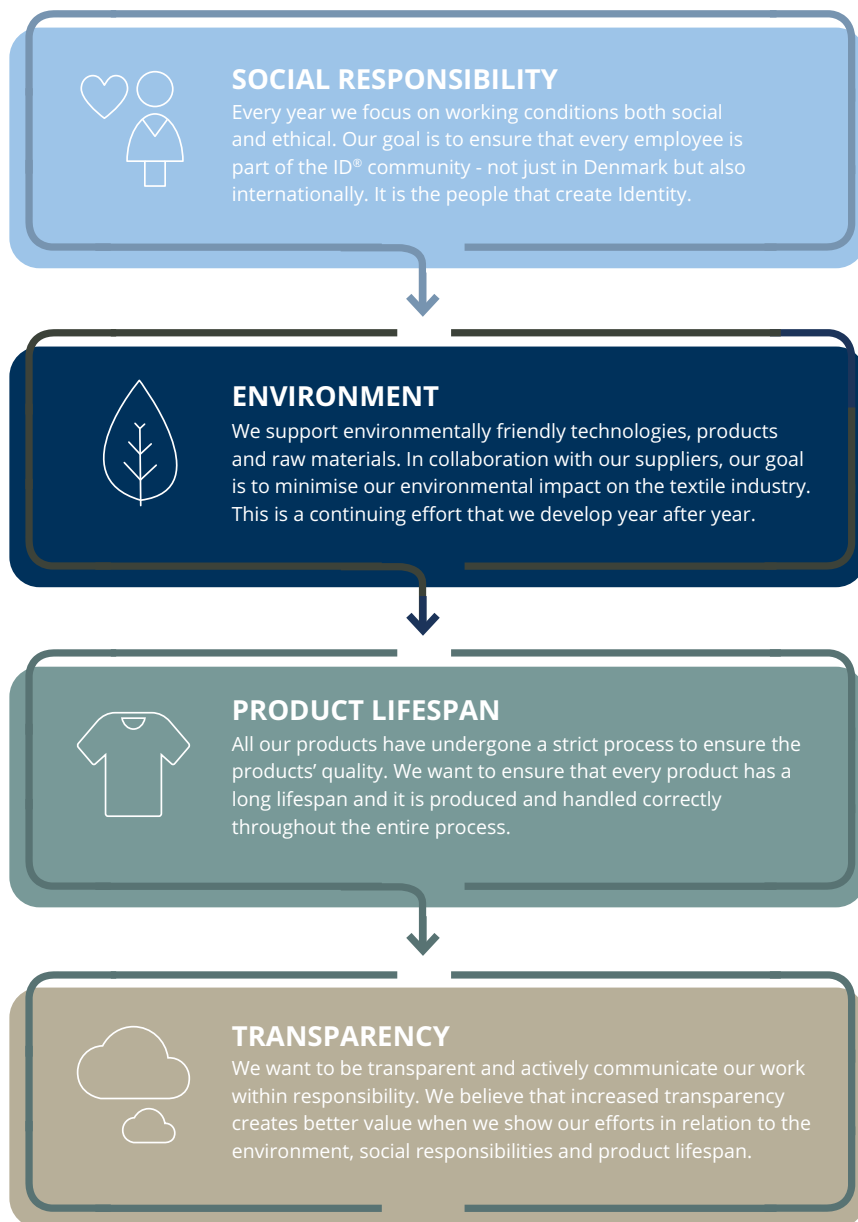

With **CARE** for the environment, we have selected the best materials, maintaining the good quality in the complete lifespan of the products.

UNITE

The ID® garments are created to emphasize common expression and to **UNITE** people wearing Corporate Wear and showing their identity.

THE KEYWORD IS RESPONSIBILITY

For ID® it is a constant journey towards creating a more responsible world. Over the last 12 years we have taken both small and big steps towards reaching our common goal - making products that do not affect people and environment more than necessary. Throughout our value chain we take responsibility for constantly working for accountability. Specifically, we work with four tracks in our work with responsibility.

MEMBERSHIPS

ID® is a happy member of the Better Cotton Initiative. BCI exists to make global cotton production better for the people who produce it, better for the environment it grows in and better for the sector's future. Better Cotton is sourced via a system of Mass Balance and is not physically traceable to end products. By using a system of Mass Balance, BCI is able to reach more farmers, meaning more sustainable practices are being implemented around the world.

ID® is a member of Global Compact. At ID® we want to act responsibly and contribute to a sustainable development. So we are proud of our membership of UN's Global Compact. It provides us with a basis for working with the internationally acknowledged conventions about: Human rights · Employees' rights · Environment · Anti corruption

ID® is a member of amfori BSCI. BSCI (Business Social Compliance Initiative) is a network of 750 European companies which has formulated a set of common ethical principles for purchasing and production in non-EU countries. This means production where there is no child labour, forced labour or any form of discrimination, the guarantee of a safe working environment and reasonable wages and working hours. The rules also carefully consider the environment.

The Accord on Fire and Building Safety in Bangladesh (the Accord), from May 2018, is a three year independent, legally binding agreement between apparel brands and retailers and trade unions designed to build a safe and healthy Bangladeshi Ready made Garment (RmG) Industry.

Move Forward with Confidence

The Bureau Veritas group is one of today's largest companies in the world within inspection, classification, counseling and certification. They supply services of high quality to help their customers comply with the increasing demands on quality, safety, environmental protection and social responsibility.

At ID®, we are a member of the Textile Revolution, a textile policy think tank working for a textile industry that makes a positive impact on the world and the people who live in it. In collaboration with the Textile Revolution, we want to become frontrunners in the circular transition by calculating our climate and environmental footprint and then implementing circular solutions where the product is used in new ways at the end of its life.

CERTIFICATIONS

EU Ecolabel: DK/016/063

The Ecolabel is your guarantee that clothing bearing the EU Ecolabel impacts the environment as little as possible, and ensures that the clothing does not contain pesticide residues and other environmentally harmful chemicals, that eco-friendly dyes have been used and that waste water is handled responsibly

TENCEL™ Lyocell is made of natural raw material wood sourced from sustainable forestry in an environmentally-friendly closed-loop system in which water and solvents from production are reused. TENCEL™ Lyocell provides breathability, softness and is quick-drying and naturally reduces bacterial growth

The product has been developed to meet the hygiene requirements for food production as defined in HACCP - certified by Hohenstein

ISO 15797

ISO 15797 is an international standard for evaluating a product's suitability for industrial washing. The tests are carried out in close cooperation with external experts.

STANDARD 100
1376-215
DTI

STANDARD 100 by OEKO-TEX®, **Annex 4, product class 2** is subject to requirements covering pH value and the content of, for example, pesticides and heavy metals

STANDARD 100
1976-299
DTI

STANDARD 100 by OEKO-TEX®, **Annex 6, product class 1** places even stricter requirements on the content of hazardous to human health and the environment

STANDARD 100
2276-372
DTI

STANDARD 100 by OEKO-TEX® **Recycled, Annex 6, Product Class 1** places additional, more stringent requirements on products which contain more than 20 % recycled fibre material and are subjected to special test processes

READ OUR RESPONSIBILITY REPORT

Read more about our responsible initiatives in our **report** at

doc.id.dk/en/responsibility-report/

WASH, WEAR AND REPEAT

High quality level of cotton/ polyester mix

High delivery performance – so no need to keep your own stock

Low shrinkage, lifelong stability developed for industrial washing

When washed according to ISO 15797 we ensure a long lifetime.

CSR is about taking responsibility for a company's impact on people and the environment. This has given us a reputation as one of the best in the industry at delivering high quality, well-designed and durable products. And we will continue to do so. We believe that there are always customers who understand the value of

quality – and responsibility is a quality. A good product which lasts a long time is far more ethical and environmentally friendly than a throw away product. This makes our contribution to responsibility very concrete and effective, as it is integrated into everything we do – every day.

MADE TO LAST

MATERIALS

Combination of cotton and polyester to get the best from both qualities. Cotton provides softness and breathability and polyester provides durability and stability.

WASHING

Can withstand being washed at 80°C (white) or 60°C (colours).

SIZE & COLOURS

Choose between 21 colours and a size range from XXS - 7XL.

LARGE STOCK

Very large stock of products – high delivery performance.

SUPPLIER RELATIONS

Long term relations to our suppliers around the world ensures value throughout the process.

TREATMENT

PRO Wear treatment for low shrinkage, extra stability and long lifetime

SEAMS, BUTTONS & ZIPPER

Strong seams securing long life time. All plastic buttons are stained through, and all press studs are made of stainless metal, so both types are well suited for industrial washing. Strong zippers.

CERTIFICATIONS

OEKO-TEX® certified, which is your guarantee that the clothing contains no harmful substances. EU Ecolabel certified, which is your guarantee for environmentally friendly production and manufacturing of products.

ONE-STOP SHOPPING

ID® SERVICE

READY TO WASH

You can do all your shopping in one place, saving time, money and administration. Since we handle the entire clothing process at ID® Identity, you avoid the long delivery times that other production options may involve. It does not get any easier than this.

SPEED UP YOUR BUSINESS

Everything is handled via a smooth and efficient ordering system that improves product quality and delivery reliability. This leaves you to spend the time on your core business. You are always welcome to contact us if you want to know more about our chip and logo service or warehouse capacity.

JUST LEAVE IT TO US

Let us make our products into yours. ID® Service can add logo, embroidery or chip to your company clothing. It does not have to be expensive or time-consuming. It is easy, faster and saves time.

We make our products into yours

Did you say chip? Yes, of course we can attach chip

Product ideas? Let our designers help you

ALWAYS ON STOCK

ID® WAREHOUSE

A STABLE PRODUCT RANGE

One of ID®'s greatest strengths is that we always stock an extensive basic range. At ID® you can choose products from an extensive and stable basic collection – and we have them in stock in large quantities. This is a deliberate choice on our part to make it safe and easy for you to supplement your range – so that you can get what you need, and quickly.

STRONG LOGISTIC SYSTEM

We have developed a very strong logistic system operated by skilled and reliable employees, drawing on years of experience and the latest and most advanced technology solutions. They process small and very large orders alike with great precision, and ship every order, throughout Europe, within 24 hours.

ID® LOGISTICS ADVANTAGES

1
Large and wide product range

2
Good logistic and delivery performance

3
More efficient and eco-friendly packaging

4
Fast delivery - you can rely on us

5
High delivery performance?

MORE INDIVIDUAL DELIVERY SOLUTIONS

With AutoStore®, the warehouse is automated even more. This means that we at ID® meet the market's demand for speed and flexibility. We can now offer more individual and flexible delivery solutions, where it e.g. is possible to choose the number of shipping days and whether orders should be collected or shipped immediately.

WE DO NOT SHIP AIR BUT PRODUCTS

Our packing robot adapts the packaging to the content and volume of the goods. The new advanced technology contributes to a more eco-friendly and sustainable logistics management.

USE YOUR T-SHIRT AGAIN AND AGAIN

LCA | Life cycle analysis

WHAT IS A LIFE-CYCLE ASSESSMENT?

LCA is an abbreviation of Life-Cycle Assessment. LCA provides a detailed overview of the environmental impacts of a product. This includes everything from raw materials and extraction methods to energy, water, waste, and transport.

LCA ON SELECTED ID® T-SHIRTS

To support our work on a long product lifetime and minimising our environmental impact, we have conducted life-cycle assessments on selected ID® T-shirts in collaboration with the think tank, Tekstilrevolutionen.

THE T-SHIRT'S ENVIRONMENTAL FOOTPRINT

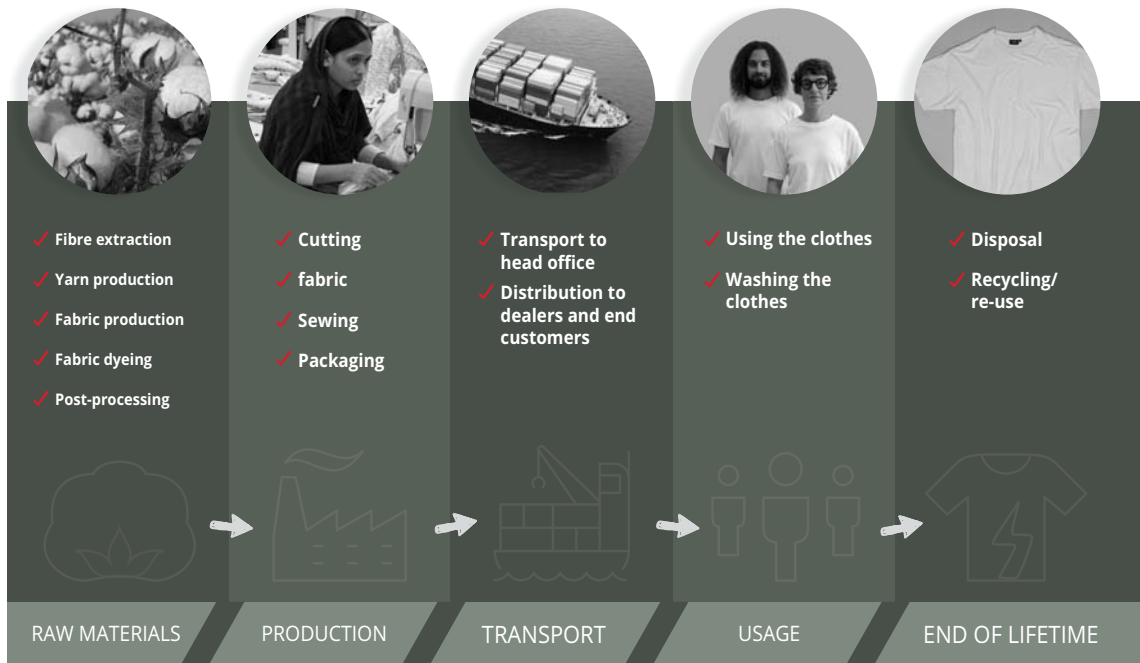

Calculating the CO² impact of a T-shirt is a complex process, so this page gives you an insight into a T-shirt's life cycle and how you can help make a difference.

Get an insight into the life cycle of a T-shirt and how you can contribute to extending the product lifespan at id.dk

Read more and see LCA results at: id.dk/en/use-your-t-shirt-again-and-again

WHAT DOES YOUR T-SHIRT GO THROUGH?

When we say that “we go all the way,” we look at the various environmental consequences of the clothing industry - from raw material extraction to production, transport, use and ultimately disposal.

// At ID[®] we believe that the most responsible T-shirt is the one that can be used again and again.

FOCUS ON RESPONSIBLE COTTON SOURCING

A PROUD MEMBER

Already in December 2020, we became a member of the Better Cotton Initiative. We are proud to be a member of the initiative as a part of our strategy to source responsibly. We choose to start the journey back in 2017, when choosing the Better Cotton production for our EU Ecolabel program.

Following our DNA, membership of Better Cotton Initiative is a natural part of our responsible progress supporting sustainable development in our supply chain and the impact on people and environment.

Why do we partner with Better Cotton Initiative?

We choose to partner with the Better Cotton Initiative to improve cotton farming globally. BCI Farmers care for the environment and implement the principles of decent work.

Cotton is an important raw material to ID® by volume, and by switching our sourcing of conventional cotton to more sustainable cotton alternatives we can have a positive impact on people and environment.

Better Cotton farmers are farmers who care for the environment and implement the principles of Decent Work.

Cotton is one of the world's most popular fabrics. It is used to make nearly half the world's textiles.

THE ENVIRONMENT

Better Cotton is grown with focus on environmental principles, which protects our planet and the people who farm and work with the cotton.

THE PEOPLE

BCI farmers receive education and training in agricultural best practice, addressing social, environmental and economic factors.

THE ECONOMY

The Better Cotton Initiative is working towards improving livelihoods and economic development in cotton producing areas.

*ONE OUT OF 20 MEMBERS IN DENMARK

*2.2 MILLION BCI FARMERS

*20% OF GLOBAL COTTON PRODUCTION

BCI exists to make global cotton production better for the people who produce it, better for the environment it grows in and better for the sector's future.

*Bettercotton.org (22.09.23)

IT'S NOT A PRODUCT

- But a responsible way of sourcing cotton

You think: *But what is the purpose then?*

Us: *Let's tell you.*

Better Cotton is sourced via a system of Mass Balance and is not physically traceable to end products. By using a system of Mass Balance, BCI can reach more farmers, meaning more responsible practices are being implemented around the world.

WE HAVE A GOAL

BCI SOURCED COTTON ACHIEVEMENTS

We are committed to sourcing 25% of our cotton as 'more sustainable cotton' by 2023.

25%

PRO WEAR CARE EU ECOLABEL

We want to make a positive difference to the people we work with. This is why we introduced the PRO Wear CARE textile series, which carries the EU Ecolabel.

The EU Ecolabel is your guarantee that the production and manufacturing processes have as little impact on the environment as possible.

BETTER FOR ENVIRONMENT

- ✓ More sustainable fibre production
- ✓ Restrictions on hazardous substances
- ✓ Tested for durability

When choosing EU Ecolabelled products, you are helping to make a difference

Responsible end product with a long lifespan

We care for the environment

Social responsibility

Low water & air emission

No thank you to toxic chemicals

Educated farmers

MADE TO LAST

Hard work demands clothing which is designed for movement and wear. PRO Wear by ID[®] is developed for people who are active in their work, and need clothing which simply lasts, day in and day out.

TESTED ACCORDING TO ISO 15797

100% of PRO Wear by ID[®] products withstand industrial washing and drying.

// CLOTHING THAT ARE MADE TO LAST

PRO Wear by ID® is available in many sizes and styles, and all products are designed for movement, so they are comfortable to wear in any working situation. The clothing is also pre-shrunk, so you can always rely on the fitting. It can handle daily washing at temperatures up to 80°C for whites, while colours can be washed at 60°C.

FEATURES

Breathability is measured in MVP (Moisture Vapour Permeability). MVP specifies how much moisture in grams can be transported out per square metre per 24 hours

3000 MVP

4000 MVP

5000 MVP

Windproof material

Water repellent product made of waterproof or water resistant material, without waterproof seams

Waterproof product with waterproof seams. The waterproof level is measured as the water column pressure in millimetres, and expresses how much water pressure a fabric can withstand before water presses through it

8,000 mm water column pressure

10,000 mm water column pressure

Breathable, wind and water resistant three-layer membrane

Taped seams for maximum protection against wind and rain

ISO 15797 is an international standard for evaluating a product's suitability for industrial washing. The tests are carried out in close cooperation with external experts.

Moisture transmitting, breathable and quick-drying material

Permanent moisture transmitting, breathable and quick-drying material

Quality zipper from YKK

Waterproof zipper

Breathable, wind and water resistant and moisture transmitting

INDUSTRIAL WASHING RECOMMENDATIONS

The PRO Wear by ID® line is developed and tested for industrial washing. Below we have passed on some useful advice based on many years of experience which may contribute to optimal use and durability.

Our experience tells us, that there are differences in routines and methods in industrial washing. The differences that may be experienced could be in e.g. shrinkage and colour.

The following instructions are only a guide and serves as a supplement to our clients' own experiences.

General comments

Always check the recommendation on the care label of the garment. The products are tested according to ISO 15797, but we also recommend own wash/drying test before use.

All garments should be washed at least once before taken into use. This is important due to chemical residues and excess dye from production of fabrics and to inevitable shrinkage (also for "pre-shrunk" products). Also to minimize possible surplus fibres/fuzzing from fleece and sweat products which are brushed inside, which disappears after 2-5 washes.

Consider shrink variations up to app. +/- 5-7% for sweat products and other up to app. +/- 5%, and fabrication tolerances up to +/- 1,5 cm.

Industrial washing

Do not apply bleaching and chemicals with optical brighteners on coloured products. Effective chemicals incl. chlorine, disinfectants, lye and optical brighteners can reduce lifetime and influence quality/appearance of fabrics and accessories.

The indicated type and dosage from the supplier of chemicals must be followed closely. Textiles should always be sorted/washed according to type and colour.

Wash the garments with the inside out and close zippers and velcro.

Avoid "over drying". Choose the correct drying temperature according to the fibre type of the garment. Remember that polyester and TENCEL™ Lyocell dries faster than cotton, e.g. fleece and other products.

Steamer (tunnel) drying may influence fit/shape and shrinkage pattern. Carry out own test to clarify possible effects from the drying method. Steam must be added to avoid "over drying."

How to extend the durability of logos

It is important to choose logo quality and type (print/transfer, embroidery) considering the use and washing/drying method of the garment.

The wash instruction in the care label on the clothes also applies for the logo.

Harsh chemicals such as bleach etc. can affect the logo in wash.

Other ID® products in industrial washing

Other ID® products besides PRO Wear by ID® are used in industrial washing. However, it is very important to follow the instructions on the care label for such products. Especially for chemicals, temperatures and drying methods there are certain limitations which must be observed.

ID® cannot assume any responsibility for complaints arising from inappropriate use and/or washing of our products.

By any complaints, please provide 3-5 samples + information about the production number from the carelabel inside, extent/volume and a copy of the washing and drying process and chemical prescription.
