

Nordlog, Italian hub of metal, reaches Sweden and becomes sponsor of Umeå FC

Nordlog is a company based in Verona, North Italy, specializing in the production of light metalworking and a reference hub for companies in Northern Europe looking for a reliable partner to produce and market in Southern Europe.

It stands out for the variety of services offered: design and prototyping, consulting, production, coating, assembly, logistics of metal-based products with bespoke solutions.

The foundation of Nordlog comes from the 40 years experience of VRB - a company of the same holding IFP - a pioneer in the powder coating sector in Europe.

The mindset: it is important how you do it and not what you do. The values that underpin the company are based on three main aspects: passion, creativity and team spirit. Nordlog brings its expertise in the industrial sector together with its passion for football.

The desire is to introduce different ideas and something unique, to tell an authenticity that meets challenge and courage. For this reason Nordlog has decided that Umeå FC represents those values of today's football world that must be upheld. Sport is like business. It requires perseverance, courage, sacrifice, dedication. It doesn't matter where you come from, it matters who you are and where you want to go.
