F.A.O. Andrew Bright

Reference – UK Rendering Limited
We write to confirm that UK Rendering have been working on behalf of QFF over the past year undertaking fire remedial works including the removal and replacement of EWI systems and decking / balconies on high and medium rise buildings.

The works have all be undertaken in a safe manner and to a very high standard despite working to challenging programmes. This has been made possible with the extensive labour resource with up to 60 operatives provided on our schemes at the peak.

Shaun is always personally available which we appreciate and he is always happy to meet on-site to overcome any issues and help us react to any changes that are required to satisfy the fire officers and building control. This combined with the resource pool available are key to the success of our working relationship to date.

Recent Contracts

NV Salford Quays, Manchester (28 weeks completed Jan-22)
K-Systems EWI and timber deck replacement Value - £3.6 Million

Albion Mill, Great Ancoats, Manchester (ongoing) – planned to be completed July 2022
