Kirkenes is located at 69 degrees North, which is as far east as Istanbul and Kairo. Russia and Finland are our closest neighbours, and this strategic location has been an important factor in the dramatic history of Kirkenes. You can learn more about the area at the local Borderland Museum or at one of our guided tours. The climate in Kirkenes is special and very dry, especially in winter. The clear and stable weather makes Kirkenes one of the best spots to observe the Northern lights during winter. Come and visit this winter wonderland during Dec – April. We offer a great range of activities all year round, in a place where winter and summer are like night and day!

Facts:

- Kirkenes is the main town in Sør-Varanger municipality with approx. 10.000 inhabitants.
- Due to Kirkenes northern location, you can experience midnight sun from 19. May until 25. July and polar night from 28. Nov until 15. Jan.
- Kirkenes is a modern day town, placed in the middle of wild nature. The town has a good infrastructure with both airport, harbour, hospital, and a variety of stores.
- July is the warmest month, with a average temperature of 12,4 °C. The coldest month is January with - 10,5 °C.
- Kirkenes is one of the main ports for harvesting king crabs in the Barents Sea, which is why we call ourselves the King Crab city.
- The municipality is huge with 3900 sq ft, and we recommend visiting the most famous places in the Kirkenes area like the Pasvik valley, Neiden, Bugøynes and Grense Jakobselv.
